Ringer's Lactate Medium

Most of the BSI Intravenous Infusions are crafted by adding ingredients to a ready-made bottle of Ringer's Lactate Intravenous Solution.

Also known as Sodium Lactate Solution and Hartmann's Solution, Ringer's Lactate is a mixture of 4 types of electrolyte salts; Calcium Chloride 2h20, Potassium Chloride, Sodium Chloride, and Sodium Lactate, in pure water. It is on the World Health Organization's List of Essential Medicines, which are the safest and most effective medicines required in health care.

Ringer's saline solution was invented in the early 1880s by Sydney Ringer, a British physician and physiologist. Ringer was studying the beating of an isolated frog heart outside of the body. He was able to identify the substances in blood that would allow the isolated heart to beat normally. In the 1930s, the original solution was further modified by American pediatrician Alexis Hartmann for the purpose of treating acidosis. Hartmann added lactate, which mitigates changes in pH by acting as a buffer for acid. Thus the solution became known as "Ringer's lactate solution" or "Hartmann's solution".

Ringer's Lactate Medium

Infusion Base - Electrolyte Salts

What each ingredient does for the body;

Potassium is an electrolyte that when lost difficult for the body to absorb through digestion, but is readily absorbed through IV infusion. It also decreases the risk of stroke, lowers blood pressure, protects against loss of muscle mass, preserves bone mineral density, and reduces the formation of kidney stones.

Lactate metabolizes in muscles development. The lactate is also metabolized into bicarbonate by the liver, which can help correct metabolic acidosis, of ten due to dehydration, and help the liver to cleanse of toxins. Lactate helps prevent muscle acidosis, and lactate itself is an effective energy source. Calcium is extremely important, especially in later age to maintain strong teeth and bones. The heart, muscles, and nerves also require calcium for proper function. Calcium, along with vitamin D, are said to protect against cancer, diabetes, and high blood pressure.

Sodium Chloride (salt) is vital to all human functions, and a necessary addition to the infusion, in regulation of the pH to equal that of human blood. Sodium is an electrolyte that regulates the amount of water in the body.

Ringer's Lactate is primarily used for replacing fluids and electrolytes in those who experience low blood volume or low blood pressure - usually due to trauma, severe dehydration, or severe parasite infection. It's a very good medium for transfusing nutrients and drugs, pH balanced for human blood. Human blood has a base pH of 7.36, making it naturally slightly alkaline, hence a little salty.

It restores fluid and electrolyte balances, produces diuresis, and acts as an alkalizing agent (reduces acidity). More than anything else, Ringer's Lactate is used to compensate for dehydration, for heat exhaustion, in cases of blood loss before actual blood can be transfused, sports and industrial trauma, and importantly for the administration of medications and vitamins.

Vitamin C / Ascorbic Acid

Infusion Additive - Ascorbic Acid (and Sodium Ascorbate)

Vitamin C / Ascorbic Acid

Infusion Additive - Ascorbic Acid (and Sodium Ascorbate)

Vitamin C / Ascorbic Acid

Infusion Additive - Ascorbic Acid (and Sodium Ascorbate)

Vitamin C / Ascorbic Acid

Intravenous Vitamin C has been shown to neutralize and eliminate a wide range of toxins, and greatly enhance the immune system's ability to neutralize bacterial and fungal infections.

The US National Library of Medicine, in fact, contains thousands of studies demonstrating vitamin C's ability to significantly improve health, with 220 documented disease applications.

Vitamin C Infusions are repeatedly used for reducing and killing cancers, virus, and fungus, by greatly strengthening immunities. Also kills or reduces arthritis, heals the retina of the eye, strengthens brain function, repairs damaged veins and some chronic heart conditions. Often used in conjunction with BSI topical and oral medications.

A short list of documented illnesses cured or prevented using mega-doses of Vitamin C Infusions: Acute hepatitis, chicken pox, dysentery, diphtheria, herpes, influenza, measles, mumps, polio, streptococcal infections, and viral pneumonia.

The following, among others, are documented to be reversible and preventable with repeated Vitamin C Infusions: HIV, leprosy, tuberculosis, and typhoid fever. Vitamin C Infusions have also been used successfully to treat poisonings: alcohol, barbiturates, carbon monoxide, pesticides, radiation, most heavy metals, mushrooms, snake & spider venom. Lupus and MS often respond well.

We're on your side, here to help

We're on your side, here to help

Vitamin C / Ascorbic Acid

Infusion Additive - Ascorbic Acid (and Sodium Ascorbate)

Laboratory studies have shown the following, regarding Vitamin C infusion:

- **Supplements and supports essential vitamins, minerals, nutrients, and amino acids.**
- **A natural antibiotic, anti-viral, anti-fungal and natural detoxifier**
- **Boosts and restores immune system functions, effective as a flu preventative**
- **Effectively eliminates and neutralizes a wide variety of toxins and infections, assists in returning body to predeficiency states**
- **Increases energy and appetite**
- **Provides intravenous nutritional support to patients who cannot or will not eat**
- **Stimulates collagen formation**
- **Inhibits hyaluronidase to prevent cancer metastasis**
- **Induces tumor cell death (apoptosis)**
- **When combined with magnesium, relieves pain.**

A moderate deficiency of vitamin C in the diet causes a mild form of scurvy, a disease with symptoms of weakness, lethargy, easy bruising, and bleeding. The lack of vitamin C makes collagen thinner in texture. With vitamin C, collagen becomes thicker (improving the appearance of skin and bodily features). Some have suggested that most, if not all, cancer patients are greatly deficient in vitamin C, hence they suffer from scurvy.

Vitamin C / Ascorbic Acid taken intravenously goes directly to the body's tissues. At the proper levels, Vitamin C is antihistamine, anti-toxin, anti-biotic, and antioxidant. Vitamin C is also known for its anti-aging properties. The benefits of longterm vitamin C consumption are widely acknowledged and include the reduction and elimination of cancer tumors, cardiovascular disease, and cataracts. Higher vitamin C intakes have also been associated with increases in HDL cholesterol (the beneficial cholesterol), and decreases in LDL cholesterol oxidation, decreased blood pressure, and decreased cardiovascular mortality.

Vitamin C is necessary for the growth, development, and repair of all body tissues. It's involved in many body functions, including formation of collagen, absorption of iron, the immune system, wound healing, and the maintenance of cartilage, bones, and teeth. Eyes need more vitamin C than other parts of the body, and when lacking, eyes will begin to lose color depth, focus, elasticity, etc. - a gauge of the immediate need for C.

Vitamin B Complex

Infusion Additive - Vitamin B Complex

Vitamin B Complex

Infusion Additive - Vitamin B Complex

Vitamin B Complex

Infusion Additive - Vitamin B Complex

Vitamin B Complex

BSI often adds Vitamin B Complex to IV infusions. Two different combinations are offered, which one depends on the needs of the patient.

IB-3 is vitamins B-1, B-6, B-12
Or IB-6 is vitamins B-1, B-2, B-3, B-5, B-6, B-12

How much and which combination depends on illness and anemia, etc. Vitamins B-2, B-3, B-5 can only be given infrequently.

Vitamin B-1 (Thiamin). Beneficial for : The nervous system, brain, muscles, heart, stomach, and intestines. It is also involved in the flow of electrolytes into and out of muscle and nerve cells. B-1 is low in people suffering from alcoholism, Crohn's disease, anorexia, Beriberi (which affects breathing, eye movements, heart function, and alertness).

Vitamin B-2 (Riboflavin). Beneficial for : Skin, muscle, nerve, heart and eye health, including inhibiting the development of cataracts, production of red blood cells and antibodies. Absorption or activation of iron, folic acid and Vitamins B1, B3 and B6. Conversion of tryptophan, an amino acid, into niacin. Production of hormones by the adrenal glands. Maintenance of the mucous membranes in the digestive system. Healthy development of the fetus. Helps prevent migraine headaches.

Vitamin B Complex

Infusion Additive - Vitamin B Complex

Vitamin B-3 (Niacin or nicotinic acid or Vitamin B-PP). Beneficial for:

Energy metabolism (turnover of carbohydrate, fat, and protein), stable energy levels, vasodilation, blood circulation, cholesterol (lipids) balance, proper nervous system function, mental balance and function, skin and mucous membranes, reduction of fatigue and exhaustion.

Vitamin B-5 (Pantothenic acid). Beneficial for : Helps the body convert fat and protein, nervous system function, eyes, skin, hair, and liver health. Specifically, B5 helps create red blood cells and stress-coping hormones, and sex hormones.

Vitamin B-6 (Pyridoxine). Beneficial for : Protein, fat, and carbohydrate metabolism, red blood cells creation, neurotransmitter function, immune system vitality. Just like with vitamin C, the body cannot produce vitamin B6, so it must be obtained from food or supplements.

Vitamin B-12 (Cyanocobalamin). Beneficial for : Red blood cell formation, anemia, bone health, osteoporosis, macular degeneration, mood and depression, brain function, homocysteine reduction, healthy skin-hair-nails. Most vegetarians and especially vegans must supplement B-12.

Symptoms of Vitamin B Complex Deficiency;

- Weakness, tiredness, or lightheadedness.
- Heart palpitations and shortness of breath.
- Pale skin.
- A smooth tongue.
- Constipation, diarrhea, loss of appetite, gas.
- Nerve problems like numbness or tingling, muscle weakness, and problems walking.
- Vision loss.
- Mental problems

Magnesium

Infusion Additive - Magnesium

Magnesium

Infusion Additive - Magnesium

Magnesium

Infusion Additive - Magnesium

Magnesium

The essential mineral Magnesium is normally abundant in the body, but due mostly to modern agriculture, has become deficient in the diet from depletion in soils, even organic. Without magnesium, protein cannot be metabolized, nerves cannot function, and muscles cannot grow. Magnesium is required to produce energy from carbohydrates, proteins, and fats. It's essential for proper DNA cellular function. Magnesium is also crucial in production of the antioxidant glutathione.

Magnesium is calming to the nervous system as it relaxes blood vessels and promotes better sleep. Intravenous magnesium has uses in both mild and severe medical problems like migraines, medication side effects, asthma attacks, high blood pressure, pre-eclampsia of pregnancy, and bad heart rhythms. It is estimated that 50% of people are magnesium deficient.

Intravenous administration, magnesium immediately benefits the body, without limiting digestive ability. Bathing with magnesium is also highly beneficial. Skin, the largest organ, naturally absorbs the exact amount needed by the body, when bathing or by direct application of magnesium solutions to the skin. BSI Compound V / VitaBath, combined with Compound SO / Bath and Skin Oil can restore skin tone and nerve balance, with near immediate effect. benefits the body, without limiting digestive ability.

Intravenous magnesium has uses in both mild and severe medical problems like migraines, medication side effects, asthma attacks, high blood pressure, pre-eclampsia of pregnancy, and bad heart rhythms. It is estimated that 50% of people are magnesium deficient.

Intravenous administration, magnesium immediately benefits the body, without limiting digestive ability. Bathing with magnesium is also highly beneficial. Skin, the largest organ, naturally absorbs the exact amount needed by the body, when bathing or by direct application of magnesium solutions to the skin. BSI Compound V / VitaBath, combined with Compound SO / Bath and Skin Oil can restore skin tone and nerve balance, with near immediate effect. benefits the body, without limiting digestive ability.

Magnesium

We're on your side, here to help

Magnesium

The essential mineral Magnesium is normally abundant in the body, but due mostly to modern agriculture, has become deficient in the diet from depletion in soils, even organic. Without magnesium, protein cannot be metabolized, nerves cannot function, and muscles cannot grow. Magnesium is required to produce energy from carbohydrates, proteins, and fats. It's essential for proper DNA cellular function. Magnesium is also crucial in production of the antioxidant glutathione.

Magnesium is calming to the nervous system as it relaxes blood vessels and promotes better sleep. Intravenous magnesium has uses in both mild and severe medical problems like migraines, medication side effects, asthma attacks, high blood pressure, pre-eclampsia of pregnancy, and bad heart rhythms. It is estimated that 50% of people are magnesium deficient.

Intravenous administration, magnesium immediately benefits the body, without limiting digestive ability. Bathing with magnesium is also highly beneficial. Magnesium

Infusion Additive - Magnesium

Asthma is frequently treated with IV magnesium in hospitals. Nerves of the lungs can become over-stimulated during asthma attacks, causing narrowing of the airways, which can result in wheezing and shortness of breath. By giving magnesium intravenously, nerves and muscles of the lungs can quickly relax, restoring air flow naturally.

Magnesium is a powerful vasodilator - when blood vessels are dilated, blood pressure comes down dramatically. Be cause migraines are often due to excitation of nerves in the brain, magnesium works to calm them, quickly stopping the migraine, and other types of headaches too.

Blood pressure is regulated in part by nerves that squeeze blood vessels. Magnesium turns down the squeeze, thus lowering the blood pressure naturally.

Magnesium deficiency may lead to irregular heartbeats and can cause or worsen multiple medical conditions such as Chronic Fatigue Syndrome and Fibromyalgia, as well as lead to anxiety and tense muscles or spasms. A severe deficiency of magnesium can cause the muscles in the body to constantly spasm.

The body needs magnesium to perform over 300 biochemical reactions necessary to sustain life. Magnesium is also a natural calcium channel blocker, that helps reduce the work load of the heart. Magnesium deficiency is often the cause of irregular heart beats or arrhythmia. IV magnesium results in dilation of blood vessels, allowing the heart to work more efficiently.

Magnesium sulfate given by intravenous infusion, and / or applied to the skin, has proven effective in the treatment of anxiety, heart problems, headaches, nervousness, muscle spasms, high blood pressure, chronic fatigue, malnutrition, and so much more.

DMSO

Infusion Additive - Dimethyl Sulfoxide

DMSO

Infusion Additive - Dimethyl Sulfoxide

DMSO

Infusion Additive - Dimethyl Sulfoxide

DMSO

DMSO is useful as a pain reliever and also for burns, acne, arthritis, mental augmentation, strokes, amyloidosis, head injury, Scleroderma. It soothes toothaches, eases headaches, hemorrhoids, muscle strains, and it prevents paralysis from spinal-chord injuries and softens scar tissues. In fact, it is useful in well over 300 ailments and is safe to use.

Sulfur: The Stuff of Life

DMSO is essentially bio-available sulfur. Sulfur compounds are found in all body cells and are indispensable for life, they are needed for a number of chemical reactions involved in the detoxification of drugs and other harmful toxins, and is a potent treatment of a number of conditions such as depression, fibromyalgia, arthritis, interstitial cystitis, athletic injuries, congestive heart failure, diabetes, cancer, and AIDS. Among the sulfur compounds, DMSO has the widest range and greatest number of therapeutic applications ever shown for any singletherapeutic compound. With at least 40 pharmacological properties, DMSO is beneficial in the prevention, relief or reversal of numerous diseases. The popular health food store item known as MSM is a derivative of DMSO.

DMSO

Infusion Additive - Dimethyl Sulfoxide

DMSO is an effective pain killer, blocking nerve conduction fibers that produce pain. It reduces inflammation and swelling by reducing inflammatory chemicals. It improves blood supply to an area of injury by dilating blood vessels and increasing delivery of oxygen and by reducing blood platelet stickiness. It stimulates healing, which is a key to its usefulness in any condition. It is among the most potent free radical scavengers known. DMSO hooks on to those molecules and they are then expelled from the body with the DMSO.

DMSO promotes the excretion of urine and functions as a muscle relaxant. It boosts the immune system, increasing the production of white cells and macrophages that destroy foreign material and pathogens in the body. It also has antibacterial, anti-viral and anti-fungal properties. DMSO also increases the permeability of cell membranes, allowing a flushing of toxins from the cell.

As a source of sulfur, DMSO aids in heavy metal detoxification. Sulfur binds with toxic heavy metals (mercury, lead, aluminum, cadmium, arsenic, nickel, and more) and eliminates them via urination, defecation, and perspiration. Intravenous administration of DMSO markedly reduces pathological intestinal permeability while preserving the gut's absorption capacities (Wang et al, 1996). Considering that gut permeability ('leaky gut') has a fundamental role in chronic degenerative diseases, this is of great clinical importance.

DMSO, also known as methylsulfonmethane or MSM, is a derivative of DMSO. MSM, though effective, hasn't surpassed the popularity or potency of DMSO. Sulfur is an element of the earth and it is essential to life, among the most prevalent elements in the human body. Allergic reactions to sulfur are not possible because sulfur has no protein component. When people are 'allergic to sulfur', what they really mean is that they are allergic or sensitive mainly to certain sulfur-containing drugs or proteins, most notably sulfa antibiotics (sulfonamides) or to sulfites (preservatives used in wines and some foods), or to foods with a high sulfur content (broccoli, cauliflower, garlic, onions, etc). Many individuals with allergies to sulfa drugs, sulfites, or high sulfur containing foods do not experience problems taking DMSO, because apart from sulfur, DMSO bears no relation to these substances.

EDTA

Infusion Additive - EDTA Chelation Therapy

Detox with Chelation Therapy Helps the Heart & Brain

EDTA Chelation Therapy is an intravenous treatment that not only rids the body of potentially deadly toxins, but also restores good circulation to bodily tissues, while removing plaque along arterial walls. It has been proven to effectively treat atherosclerosis (hardening of the arteries) and gangrene, and can dramatically improve the quality of life for patients with arthritis, lupus, Scleroderma, and failing memory.

Intravenous EDTA (ethylene diamine tetra-acetic acid). EDTA chelation therapy is primarily prescribed for the removal of heavy (and light) metals, especially mercury, lead, aluminum, radioactive isotopes, as well as plaque build-up on artery walls and heart capillaries, de-calcification of the pituitary gland (from fluoride), and more. These unwanted metals interfere with enzyme function, nerve and brain function, heart and lung function, skin health, hair growth, immunities, mood, and tend to promote free radical damage.

At BSI, we administer EDTA via vitamin C IV infusion, and occasionally add DMSO to increase effectiveness. Depending on the disease and its severity, a patient may need between 3 and 10 infusions to achieve full healing. The patient is given a capsule of colloidal trace minerals to replace those removed through chelation.

EDTA

Infusion Additive - EDTA Chelation Therapy

Initially introduced in 1914 to remove mercury from coal miners, the U.S. Food and Drug Administration has approved the use of chelation therapy with EDTA for treatment. EDTA IV therapy shows nearly instantaneous and powerful effects on the body. An IV session usually lasts to 90 minutes, during which time between 25 mg to 50 mg of EDTA (plus vitamin C and other nutrients) are administered. The number of treatments necessary depends on the individual's condition. EDTA can also be administered in low doses as preventative measure. Most patients appear visibly younger, experience more stamina and energy and see their disease symptoms disappear.

Potential benefits of BSI IV chelation:

- Prevents cholesterol deposits
- Reduces blood cholesterol levels
- Lowers high blood pressure
- Helps avoid bypass surgery
- Helps avoid angioplasty
- Removes atherosclerotic plaques
- Dissolves intra-arterial blood clots
- Normalizes cardiac arrhythmia
- Has an anti-aging effect
- Increases intracellular potassium
- Improves heart function
- Removes mineral and drug deposits
- Dissolves kidney stones
- Reduces serum iron levels
- Reduces heart valve calcification
- Reduces varicose veins
- Heals calcified necrotic ulcers
- Reduces intermittent claudication (cramping)
- Improves vision in diabetic retinopathy
- Decreases macular degeneration
- Dissolves small cataracts
- Eliminates heavy metal toxicity
- Makes arterial walls more flexible
- Prevents osteoarthritis
- Reduces rheumatoid arthritis symptoms
- Lowers diabetics' insulin needs
- Reduces Alzheimer-like symptoms
- Reduce stroke/heart attack after-effects
- Helps prevent cancer
- Helps improve memory
- Reverses diabetic gangrene
- Restores impaired vision
- Detoxifies snake and spider venoms

Piracetam

Infusion Additive - (2-oxo-1-pyrrolidine-acetamide)

Piracetam

Piracetam IV Supplement is a nootropic used by millions of individuals around the world. Piracetam reviews report a range of beneficial effects, such as improving learning ability and memory, boosting focus and concentration, and improving mood and motivation levels. It increases activity between neurons, by simply increasing uptake of glucose and oxygen into the brain and nervous system. This results in an increased mental energy and alertness. Given to students, executives, and seniors, anyone in need of increased mental and neural activity. IV injection is of much quicker and stronger response than oral supplementation, especially valuable for first time users. Most users report favorable reactions to Piracetam. Here are the main themes from online user reviews of Piracetam:

Better Access to Stored Memories: Piracetam's most famous effects relate to memory. Users report being able to recall images, names, and experiences with fine minute detail. Many comment upon the sudden recall of long-lost childhood memories.

Eliminating Mental Fog: Piracetam is frequently used in an office or school-type setting among individuals who report experiencing brain fog. Mental lethargy is reduced, allowing for more productivity and better communication with others.

Infusion Additive - (2-oxo-1-pyrrolidine-acetamide)

Mood: Heightened motivation is another benefit. Individuals have reported an increase in their energy, both mental and physical. Improvements in brain circulation may also lessen depression and brighten mood. And Piracetam may lessen symptoms of general anxiety disorder, social anxiety, and sleep disorders.

Vivid dreams: While it does not produce lucid dreaming states to the same degree as Huperzine A or Galantamine, taking dosages later in the day does appear to result in very crisp, detailed, life-like dreams for many users. One user compared Piracetam dreams to starring in a very exciting movie.

Oxygenation: Oxygen utilization in the brain is increased following Piracetam administration. This has a number of practical applications like reducing fatigue and increasing attention span. It is also thought to prevent damage to the neurons due to cerebrovascular insufficiency. It may even be helpful in treating alcoholism.

Piracetam and the Aging Brain: Many of the most dramatic benefits of Piracetam can be found when used by people suffering from cognitive degeneration. In general use, it can improve memory, reasoning ability, and concentration. Shortterm working memory and overall slowing of cognitive decline is widely reported by older patients. Piracetam has also ameliorated symptoms of Parkinson's disease and improved psychological and neurological symptoms of dementia in a double-blind trial.

Within a broad range of standard doses, Piracetam is nontoxic to the body. As it is water soluble, the body simply discards of any excess amounts by flushing it out through the urinary tract. This make it very difficult to overdose. No cases of serious harmful effects have ever been reported due to an overdose of Piracetam. According to useexperiences, Piracetam is generally considered very well tolerated. There are few side effects reported, with less than 10 percent of users having any kind of negative reaction.

There are a few notable negative drug interactions which warrant caution, and should never be taken while intoxicated or under the influence of illicit narcotics. These include alcohol, amphetamines, and blood thinners. Otherwise, Piracetam is safe to combine with most nutrient, vitamins and nootropic cognitive enhancement supplements.

Non-toxic, and safe for daily use, Piracetam makes an excellent basis for any nootropic supplement program. It is considered the best nootropic for beginners to use. It has a history of tested and proven results for the improvement of memory and fighting cognitive decline. Through good circulation and stimulation of neural communication, it encourages healthy brain function well into old age.

Piracetam

Infusion Additive - (2-oxo-1-pyrrolidine-acetamide)

Mood: Heightened motivation is another benefit. Individuals have reported an increase in their energy, both mental and physical. Improvements in brain circulation may also lessen depression and brighten mood. And Piracetam may lessen symptoms of general anxiety disorder, social anxiety, and sleep disorders.

Vivid dreams: While it does not produce lucid dreaming states to the same degree as Huperzine A or Galantamine, taking dosages later in the day does appear to result in very crisp, detailed, life-like dreams for many users. One user compared Piracetam dreams to starring in a very exciting movie.

Oxygenation: Oxygen utilization in the brain is increased following Piracetam administration. This has a number of practical applications like reducing fatigue and increasing attention span. It is also thought to prevent damage to the neurons due to cerebrovascular insufficiency. It may even be helpful in treating alcoholism.

Piracetam and the Aging Brain: Many of the most dramatic benefits of Piracetam can be found when used by people suffering from cognitive degeneration. In general use, it can improve memory, reasoning ability, and concentration. Shortterm working memory and overall slowing of cognitive decline is widely reported by older patients. Piracetam has also ameliorated symptoms of Parkinson's disease and improved psychological and neurological symptoms of dementia in a double-blind trial.

L-Creatine

Infusion Additive - Creatine

L-Creatine

Infusion Additive - Creatine

L-Creatine

Infusion Additive - Creatine

L-Creatine

Creatine is an organic compound produced by the human body, found mostly in muscles and also in the brain. Red meats and seafood also offer large amounts.

Creatine is most commonly used for improving athletic performance and increasing muscle mass in athletes and older adults. Creatine is also used by young, healthy people during brief high-intensity activity such as sprinting and weight lifting.

Creatine is added to food to improve muscle strength and athletic performance. In the U.S., a majority of sports nutrition supplements, which total \$2.7 billion in annual sales, contain creatine.

Creatine is a nitrogen-containing organic chemical that helps to supply energy to muscle and nerve cells.

It was identified in 1832 as a component of skeletal muscle and named creatine after the Greek word for flesh, Kreas.

We're on your side, here to help

L-Creatine

We're on your side, here to help

L-Creatine

We're on your side, here to help

L-Creatine

Infusion Additive - Creatine

Proven benefits of Creatine

- Helps muscle cells produce more energy
- A nootropic that enhances brain function
- Supports numerous muscle functions
- Improves high-intensity performance
- Speeds muscle growth
- Helps with Parkinson's disease
- Fights many neurological diseases
- Helps lower blood sugar levels
- Helps fight diabetes
- Helps improve brain function
- Can reduce fatigue and tiredness

Contra-Indications

Creatine long-term high-dose can harm kidneys. And this effect can be increased greatly when combined with a variety of medications. These include combination with: Cyclosporine (Neoral, San dimmune); aminoglycosides including amikacin (Amikin), gentamicin (Garamycin, Gentak, others), and tobramycin (Nebcin, others); nonsteroidal anti-inflammatory drugs (NSAIDs) including ibuprofen (Advil, Motrin, Nuprin, others), indomethacin (Indocin), naproxen (Aleve, Anaprox, Naprelan, Naprosyn), piroxicam (Feldene); and numerous others.

Creatine can also interfere with hair growth and can even trigger hair thinning. Creatine increases the levels of Dihydro-testosterone (the male hormone derived from Testosterone, and enemy of hair) in the body, therefore occasionally resulting in hair loss.

If you experience hair loss or kidney problems, stop use of Creatine and related drugs. We highly recommend those consuming largedoses of Creatine perform occasional urinalysis to insure kidney health.

Lysine

Infusion Additive - Lysine

L-Lysine

L-Lysine is an amino acid, a “protein building block”essential for cognitive function, treating internal and external injuries, and virus elimination - lysine inhibits/ destroys all types of herpes virus.

20 amino acids found in nature are needed for cell creation and growth and only 10 of them are naturally produced in the body. Proper diet and occasional supplementation are needed to keep essential amino acids in balanced abundance, required to survive and thrive. Degradation of internal cells (aging) is one of the setbacks of deficiency, which often leads to other health issues - therefore, lysine is essential for good health.

Lysine is essential in carnitine creation, which is responsible for converting fatty acids to energy. It can also help the body form collagen and promote calcium absorption - this helps with skin tightening, bone strength, and maintenance of connective tissues. It can also help ward off illness and disease.

Lysine is protective against the herpes simplex (HSV 1 and 2) virus due to being an analogue of arginine. Arginine is considered a nutrient to HSV and promotes replication while lysine works in the opposite manner, preventing replication by preventing the virus from using arginine.

Lysine

Infusion Additive - Lysine

Lysine infusions are commonly prescribed for cold sores which is a herpes breakout and treated by lysine. Cold sores often form around the lip area when immunities have increased.

Lysine is much more than an arginine inhibitor. There's strong evidence that it can affect many parts of the human biological systems in the body.

Lysine has the potential to leave healthy cells alone while inducing apoptosis in cancer-infected DNA strands. Lysine conjugates damaged cells / cancer-ridden cells of the DNA strand. Lysine has been reported effective in colorectal and bone marrow cancer treatments.

Lysine supports the absorption of calcium in the body. Calcium, along with other important nutrients such as magnesium, B vitamins, and omega fatty acids, all help to relieve the effects of anxiety.

Calcium, with support from Lysine, binds to serotonin receptors to prevent stress-induced anxiety symptoms. Lysine improves "negative and general psycho-pathology symptoms in chronic schizophrenia."

Advanced Glycation End Products (AGEs) develop in high concentrations and large numbers in diabetics leading to infections and other diabetic-related conditions. Lysine is showing to be helpful in inhibiting glycation pathways to prevent the accumulation of AGEs.

Although there's yet more studies to confirm Lysine's role in acute pancreatitis, it does have a positive effect to suppress inflammation in the digestive system. Lysine reduces the negative effects caused to pancreatic tissue by arginine. It does this by preventing inflammation from occurring and by enhancing antioxidant activity.

Cautions: Those pregnant or breast-feeding, have moderate to severe kidney disease, have osteoporosis should avoid use of supplemental lysine due to excess calcium absorption.

Selenium

Infusion Additive - Selenium

Selenium

Infusion Additive - Selenium

Selenium

Infusion Additive - Selenium

Selenium

Selenium is a nutrient essential to human health. And as an antioxidant, it helps to fight multiple types of illness.

An essential mineral found in soil, Selenium occurs naturally in certain foods (such as whole grains, Brazil nuts, sunflower seeds, seafood and BSI Compound M2 colloidal minerals). Selenium is not produced in the body, but it is essential in proper thyroid and immune system function.

Alternative medicine has greatly benefitted from Selenium in treatment of Hashimoto's thyroiditis (an autoimmune disorder of the thyroid), in treatment of high cholesterol, and lymphedema. Selenium can reduce hair loss, abdominal pain, and loss of appetite.

Studies have reported that people with higher levels of selenium have lower risk of cancer, inhibits the growth of cancer cells, including cancer of the prostate, stomach, lung, breast, and skin.

Selenium is a particularly important mineral because it supports the function of several systems. These include the endocrine, immune, and cardiovascular systems. The thyroid, part of the endocrine system, is the organ with the highest concentration of selenium per weight of organ tissue.

Selenium

Infusion Additive - Selenium

Highly beneficial for under-active thyroid, osteoarthritis, rheumatoid arthritis (RA), macular degeneration, hay fever, infertility, cataracts, gray hair, abnormal pap smears, chronic fatigue syndrome (CFS), mood disorders, arsenic poisoning, and preventing miscarriage. Also diseases of the heart and blood vessels, including stroke and "hardening of the arteries" (atherosclerosis).

Selenium is greatly beneficial in preventing serious complications from critical illnesses such as head injury and in burns, in prevention of bird flu, corona virus, treating HIV/AIDS, and reducing side effects from cancer therapies. Selenium is vital for many processes, such as: Thyroid hormone metabolism, DNA synthesis, reproduction, protection from infection, immune system function, protection from free radicals, cognitive functioning, and cancer / major disease prevention.

Selenium deficiency can produce a wide range of symptoms. The most common are: infertility in men and women, muscle weakness, fatigue, mental fog, hair loss, weakened immune system, Keshan heart disease, Kashin- Beck arthritis. Although selenium deficiency is rare, adequate supplementation is especially important for people who have: thyroid diseases like Graves or thyroid nodules, cancer, weakened immune function, HIV, Crohn's disease, or undergoing dialysis.

Contraindications: Selenium Injection should only be given diluted by addition to IV infusion, to avoid the potential for problems associated with phlebitis, chronic kidney disease (or if on dialysis), underactive thyroid, or skin cancer.

Dose Ingredients:

Selenious acid 65.4 Ug
In 1 ml of nitric acid in water.

One dose no more than once in seven days via IV infusion.

NAD

Infusion Additive - Nicotinamide Adenine Dinucleotide

NAD

Infusion Additive - Nicotinamide Adenine Dinucleotide

NAD

Infusion Additive - Nicotinamide Adenine Dinucleotide

NAD

NAD is a coenzyme found in every cell within the body and is key in numerous vital processes. It's unrelated to nicotine in tobacco. A coenzyme enhances the action of an enzyme. Water-soluble vitamins such as vitamins B1, B2, and B6 serve as coenzymes. NAD is related Vitamin B3 and is fully natural in composition and manufacture.

The body naturally produces NAD, but levels decrease with age, leading to cellular deficiencies, resulting in age-related decline. NAD counteracts many of these reactions and helps preserve the integrity of DNA, and as such, the integrity and elasticity of skin, bones, joints, muscle, brain, nerves, etc. NAD anti-aging treatments last from 4 to 14 consecutive days depending on the individual, results of Level II evaluation, and needs.

NAD helps to regulate circadian and metabolic rhythm, by increasing serotonin, a neurotransmitter associated with mood regulation, improving symptoms of depression and anxiety, and ultimately inducing better sleep. The body mostly heals during sleep. NAD is also helpful in therapy for substance abuse and addiction recovery. This treatment reduces both cravings and withdrawal symptoms, provides energy for the entire body, boosts brain.

NAD

Infusion Additive - Nicotinamide Adenine Dinucleotide

NAD Intravenous therapy is arguably the best brain restoration therapy available. NAD enhances neuron function, prevents brain cell damage, toxicity, and promotes mitochondrial biogenesis. When the brain is healthy and functioning at optimal levels, better decisions are made, and increasing productivity and achievement.

The most profound effect of intravenous NAD is reduction of cravings associated with alcohol and opiate withdrawal, because no toxic side effects are produced. After 7 to 15 consecutive treatments of IV NAD, a person battling addiction can realize a better chance of a sober and painfree life. NAD reduces withdrawal symptoms by binding /inhibiting tobarin and nervous system opiate receptors, helping to overcome cravings and risk of relapse. At the same time, this powerful coenzyme naturally protects the brain and accelerates recovery.

Patients suffering from mood disorders often have low levels of NAD-dependent coenzymes. Also, in depressed subjects, changes in the hippocampus lead to reduced functions by neurons. The hippocampus is the area of the brain primarily engaged in processing emotions. NAD increases serotonin, a neurotransmitter associated with mood regulation, and can improve symptoms of depression and anxiety.

NAD can help individuals who want to;

- Extend life span
- Restore neurological function
- Counter cognitive decline
- Restore muscle strength & function
- Boost a weight-loss regimen
- Reduce fatigue
- Improve overall energy levels
- Recover from depression
- Recover from addiction
- Recover from alcoholism

Iron

Infusion Additive - Ferric Carboxymaltose

Ferric Carboxymaltose

An intravenous infusion of chelated iron can quickly increase the body's iron levels, more immediate than by oral supplements or dietary changes. The physical benefits of an iron infusion include increased energy and easier breathing. While all human cells contain iron, it is mostly found in red blood cells.

The health benefits of proper iron levels include eliminating fatigue and many of its sources. Iron also plays a vital role in immune system function, treating anemia, boosting hemoglobin, and much more. Iron overdoses are rare and most of the time, if there is more iron in the body than necessary, the body will save it for future use. Supplemental iron is prescribed in cases of anemia and severe iron deficiency. Intravenous B vitamins are usually coprescribed.

Anemia results when hemoglobin is below normal ranges. Symptoms of anemia include fatigue, dizziness, fast heart rate, and malaise, or an overall feeling of sickness and weakness. Vegetarianism is often a cause of iron deficiency.

Iron

Infusion Additive - Ferric Carboxymaltose

Health Benefits of Iron:

- Treats anemia
- Boosts hemoglobin
- Boosts immunity
- Improves concentration

The chief function of iron is to form hemoglobin, a red protein whose main purpose is to transport oxygen in the blood. Additional hemoglobin may be needed because humans lose blood in many ways, especially from injuries. Women lose blood every month during their menstrual cycles, which is one of the most common reasons women may be more likely to suffer from anemia.

Chronic parasites infection is also a major cause of anemia, as they tend to consume blood on a continuous basis. Iron may help manage unexplained fatigue, which can affect both men and women. Even in someone who isn't anemic, low iron can still reduce energy levels. This is especially common in women during their reproductive years.

Ferric carboxymaltose is a macro-molecular ferric hydroxide carbohydrate complex, which allows for controlled delivery of iron within macrophage and monocyte cells of the immune response system. This enhances iron-binding proteins ferritin and transferrin, with minimal risk of release of large amounts of ionic iron in the body, reducing risk of over-exposure to iron. Contraindications: The use of Ferric carboxymaltose is contraindicated in cases of: Hypersensitivity to ferric carboxymaltose complex or solution or to any of its excipients, anemia not attributed to iron deficiency, e.g. other microcytic anemia; evidence of iron overload or disturbances in utilization of iron.

Adverse Reactions: The most commonly reported is nausea, followed by injection/infusion site reactions, hypophosphataemia, headache, flushing, dizziness, or hypertension. Injection/infusion site reactions are uncommon or rare. Interactions: Oral iron, if required, should not be started for at least 5 days after the last administration of IV iron.

Chondroitin

Infusion Additive - Chondroitin Sulfate

Chondroitin

Infusion Additive - Chondroitin Sulfate

Chondroitin

Infusion Additive - Chondroitin Sulfate

Chondroitin Sulfate

Chondroitin sulfate is the basic structural component of cartilage, and provides protection from compression or breakage - a most visible example is the harder but flexible parts of the ear. Chondroitin sulfate is widely used in treatment of osteoarthritis, heart disease, cataracts, and alleviation of vaccination (blood clotting) side effects. Chondroitin promotes water retention within joints and tendons, increases resiliency by acting as a lubricant, and a means to absorb shock. Body builders tend to use chondroitin to speed recovery and strengthen body structures.

BSI chondroitin is 100% absorbable, and fully useable by all parts of the body. It's locally made from animal cartilage of a wide variety of ocean fishes known as the Greater Lamnidae Isurus. These agile, free-swimming predator fish do not have bones per se, but do possess extreme permanent flexibility due to their cartilage-based internal structure - they essentially do not age - are highly active until their end.

Chondroitin sulfate is an important and abundant structural component in many different bodily tissues, including cartilage, skin, hair, and blood vessels. Diminished levels can result in the development of numerous unwanted conditions, such as hair loss/dicoloration, wrinkled skin, joint problems, and poor cardiovascular health. It is most commonly used by those who suffer from degenerative diseases affecting the joints, such as arthritis, as well as weight trainers and other athletes whose joints and connective tissues have taken a beating over the years.

Chondroitin

Infusion Additive - Chondroitin Sulfate

In addition to its anti-arteriosclerotic and lipids effects (cardio-vascular clearing), it also exhibits anti-inflammatory properties. And importantly chondroitin is an anti-coagulant (de-clotting ability), and stimulates the growth of additional coronary artery branches thus increasing collateral circulation - accelerate the healing, regeneration, and repair of myocardial (heart) tissues.

Chondroitin sulfate is a type of glycos-amino-glycan (GAG) naturally present in many body tissues and provides support structure and function of the body's connective tissues, such as skin, tendons, ligaments, bone, and cartilage.

It's considered as a "Symptomatic Slow-Acting Drug For Osteoarthritis" (SYSADOA). Pain relief and increased joint mobility are obtained after a regular administration over a prescribed period of time, often giving long-lasting effect after the end of the treatment.

Chondroitin has a long history of use as a treatment for cardiovascular disease, being first mentioned in medical literature during the 1940s. Shown to possess powerful anti-clotting properties much superior to the popular pharmaceutical drug heparin, with prolonged anti-clotting lasting for up to two full days.

IV chondroitin benefits those who have been recently vaccinated, or those who have received shedding, simply because it blocks spike-protein-caused blood coagulation, and prevents spike protein and graphene oxide from adhering to vascular walls.

Precautions

The use of chondroitin sulfate can cause unexpected beneficial reactions in people with asthma, blood clotting disorders, or prostate cancer - in which case consultation before use with a knowledgeable physician is advised. Chondroitin sulfate may interact either positively or negatively with a number of medicines, including blood-thinning drugs like Coumadin (warfarin), Plavix (clopidogrel), or Ticlid (ticlopidine) and supplements such as garlic, ginkgo, vitamin E, or red clover.

NAC

Infusion Additive - NAC (N-Acetyl Cysteine)

N-Acetyl Cysteine

N-acetyl cysteine (NAC) is a nutritive supplement form of cysteine. The adequate consumption of cysteine, in the form of NAC, is important for a variety of health reasons – including replenishment of the most powerful antioxidant, glutathione.

These amino acids help heal a wide variety of chronic respiratory conditions, fertility, and brain function. NAC is also indicated for reduction of spike protein production associated with nano-graphene replication, related to Covid diseases.

Helps Heal Respiratory Conditions. NAC helps quickly heal asthma, flu, severe lung congestion or disease, and Covid-related diseases. NAC is an antioxidant and expectorant, whereby it can loosen mucus and long-term congestion. NAC helps replenish glutathione levels, by reducing inflammation in bronchial tubes and lung tissue. NAC improves COPD symptoms, chronic bronchitis, and lung decline. NAC can also improve cystic fibrosis, asthma and pulmonary fibrosis, as well as nasal and sinus congestion due to allergies or infections. Repeated use can have longterm positive effects in the lungs.

Essential for Making the Powerful Antioxidant Glutathione. NAC, glutamine, and glycine are needed to make and replenish glutathione. Glutathione is one of the body's most important antioxidants, which helps neutralize free radicals that can damage cells and tissues in the body, essential for immune health and fighting cellular damage - which contributes to longevity.

Glutathione is one of the body's most important antioxidants, which helps neutralize free radicals that can damage cells and tissues in the body, essential for immune health and fighting cellular damage - which contributes to longevity.

N-Acetyl Cysteine

We're on your side, here to help

NAC

Infusion Additive - NAC (N-Acetyl Cysteine)

In Prevention and Healing of Kidney and Liver Damage. NAC can help prevent side effects of prescription and nonprescription drugs and environmental toxins. In fact, doctors regularly give intravenous (IV) NAC to people with acetaminophen overdose to prevent or reduce kidney and liver damage.

Beneficial in Psychiatric Disorders and Addictive Behavior. NAC helps regulate levels of glutamate – the most important neurotransmitter in the brain. While glutamate is required for normal brain action, excess glutamate (related to mono-sodium glutamate - MSG) paired with glutathione depletion can cause brain damage. This may contribute to mental health conditions, such as bipolar disorder, schizophrenia, obsessive-compulsive disorder (OCD) and addictive behaviors. NAC can minimize negative effects of schizophrenia, such as social withdrawal, apathy and reduced attention spans. NAC supplementation can also help decrease withdrawal symptoms and prevent relapse in cocaine and tobacco addiction.

Boosts Brain Health by Regulating Glutamate and Replenishing Glutathione. The brain neurotransmitter glutamate is involved in a broad range of learning, behavior, and memory actions, while the antioxidant glutathione helps reduce oxidative damage to brain cells associated with aging. NAC can slow Alzheimer's or Parkinson's. NAC can improve both dopamine function and disease symptoms such as tremors.

Helps Improve Fertility in Both Men and Women. One condition that contributes to male infertility is varicocele – when veins inside the scrotum become enlarged due to free radical damage. Surgery is the primary treatment, with supplemental NAC improves semen integrity. In addition, NAC may improve fertility in women with polycystic ovary syndrome (PCOS) by inducing or augmenting the ovulation cycle.

Can Help Stabilize Blood Sugar By Decreasing Inflammation in Fat Cells. NAC may stabilize blood sugar by decreasing inflammation in fat cells thereby improving insulin resistance. When insulin receptors are intact and healthy, they properly remove sugar from the blood, keeping levels within normal limits.

Helps Reduce Heart Disease Risk by Preventing Oxidative Damage. NAC increases nitric oxide production, which helps veins dilate, improving blood flow, lowering risk of heart attack. Oxidative damage to heart tissue often leads to strokes, heart attacks, and other serious conditions.

NAC and Glutathione Also Boost Immune Function. Proven useful for those with compromised immune function, including AIDS, Covid and more. NAC supplementation has proven to improve and often restore immune function. NAC can be administered as an IV, taken orally, as an aerosol spray, or in liquid or powder form. The most efficient is via intravenous infusion (IV). Precautions NAC is safe for adults when provided as a prescription medication. People with bleeding disorders or taking blood thinning medications should not take NAC, as it may slow blood clotting.

L-Carnitine

Infusion Additive - L-Carnitine

L-Carnitine

Infusion Additive - L-Carnitine

L-Carnitine

Infusion Additive - L-Carnitine

L-Carnitine

The most impressive benefits of L-carnitine include improved heart health, brain function, more rapid body building, and desired weight loss, among others. The main role of L-carnitine in the body is to initiate mitochondrial function and energy production in cells. It helps transport fatty acids to mitochondria where they are subsequently converted into energy. About 98% of the carnitine in the body is found in the muscles, but a significant proportion is also found in the blood and liver. L-carnitine is synthesized in the body from the amino acids lysine and methionine. It's this amino acid that fuels energy production in cells and supports nerve function. It supplies the acetyl group for burning fats in mitochondria (fatty acid oxidation) and producing acetylcholine

- Combats depression
- Helps heal Alzheimer's disease
- Helps reverse brain and nerve damage
- Improves fertility and sexual function
- Reduces chronic fatigue
- Helps with weight loss while enhancing muscle development
- Helps combat heart disease
- Slows aging
- No matter your fitness goals, whether it's losing fat or gaining muscle mass, your chances of success can greatly increase with L-carnitine.

L-Carnitine

Infusion Additive - L-Carnatine

L-carnitine & weight loss. When supplementing with L-carnatine, the body does not metabolize carbohydrates into excess fat. Helpful in losing or reducing visceral fat.

Building muscle mass. L-carnitine supplementation supports so called Growth Factor I, which serves to increase muscle growth.

Relieves muscle pain while promoting faster regeneration. L-carnitine gives significant reduction in muscle damage, especially after challenging workouts, which means that muscle tissue regenerates more quickly. And L-carnitine relieves muscle pain.

Cardiac diseases. L-carnitine reduces damage in the body, and particularly the heart, caused by errant nitric oxide production in the body, helps accelerate muscle recovery.

Improvement of blood circulation. Improves blood circulation and blood flow to the muscles. Improving blood circulation means necessary nutrients and hormones are properly transported to just where the body needs them.

Male infertility. L-carnitine can raise testosterone via androgen receptors found in muscles, positively affecting the quantity and quality of sperm. The more testosterone can bind to these receptors, the more it stimulates muscle mass growth and strength. L-carnitine can under certain circumstances, prove more effective than testosterone therapy in the treatment of dysfunctional erection.

Type 2 diabetes. L-carnitine can help diabetics increase glucose oxidation, glucose storage, as well as glucose intake. In addition, L-carnitine improves the insulin sensitivity that occurs in many patients with Type 2 diabetes, by helping to heal the pancreas.

Immune system. L-carnitine can rapidly alter the activation of immune cells, leading to an improvement in the body's immune responses, and faster healing from virus.

Brain function. L-carnitine increases brain functions while improving synaptic nerve transmission, which promotes memory improvement and brain capacity.

Most people use L-carnitine to enhance their cognition and rev up energy levels. Clinical research confirms the benefits of L-carnitine for the brain, especially in older people.

Your body makes enough L-carnitine under normal conditions. Older people and kidney disease patients often lack L-carnitine and as such might require supplementation.

Homeopathic Infusion Additive

Jintan Hitam / Nigella Sativa

Contents: Homeopathic water distillation of jintan hitam (nigella sativa), with trace grain alcohol used during processing.

Indications: In treatment of diseases such as cancer, asthma, bronchitis, cough, diarrhea, dysentery, dyspepsia, fever, jaundice, paralysis, piles and other disorders related to cardiovascular, digestive, immune, liver, respiratory & kidney systems.

Actions: Anodyne, anthelmintic, appetizing, carminative, deodorant, diaphoretic, digestive, diuretic, emmenagogue, expectorant, febrifuge, anti-inflammatory, anti-fungal, antihypoglycemic, anti-hypertensive and antihistaminic and purgative effects.

Black Seed (Jintan Hitam) cures everything but death, according to one ancient prophet. Jintan Hitam Compound IN Infusion Additive is primarily intended for cleansing and toning the liver, gallbladder, and kidneys. Traditionally famous in the South Pacific, its uses are numerous.

Homeopathic Infusion Additive

- **Acidosis:** Its alkalinity is essential and effective in combating acidosis
- **Analgesic and anti-inflammatory activity:** Thymoquinone in Jintan Hitam improves lung oxygenation, and is also antiinflammatory
- **Anemia:** The high content of iron in regenerates and reactivates the red blood cells and supplies fresh oxygen to the body. The copper content helps make the iron more available to the body. A great blood builder
- **Anticonvulsant activity:** Constituents of Jintan Hitam can inhibit seizure genesis
- **Antihistamine effects:** Has been demonstrated to minimize decreases in hemoglobin and leukocyte counts
- **Antidiabetes activity:** Known to benefit insulin immunoreactivity by decreasing glucose availability
- **Antimicrobial and antidermatophyte activity:** Works against methicillin resistant and sensitive strains of Staphylococcus aureus, inhibits growth of bacteria Escheria coli, Pseudomonas aeruginosa. Inhibits pathogenic yeast Candida albicans. Inhibits Listeria monocytogenes. Effective against worms in the liver and intestine, namely, the miracidia, cercaria.
- **Antioxidant activity:** The antioxidant effects are attributed to thymoquinone, a main constituent of the volatile oil of Jintan Hitam (nigella sativa)
- **Atherosclerosis:** A powerful solvent for inorganic calcium deposits that cause the arteries to harden
- **Blood pressure:** All its healing and medicinal values effectively normalizes blood pressure, lowering high blood pressure or elevating low blood pressure
- **Cancer:** The Thymoquinin in Jitam Hitam inhibits a number of sarcomas, is proven to kill cancer through a process known as apoptosis. Also effective in breast cancer treatment. Inhibits stomach tumors, carcinoma, and Ehrlich ascites carcinoma
- **Detoxification:** The choline from Nigella Sativa detoxifies the liver, and the entire system of excessive alcohol abuse, provided consumption is ceased
- **Gall bladder and kidney ailments:** The superb cleansing virtues are exceptional for curing ailments relating to these two organs
- **Hematological activity:** A beneficial a hypoglycaemic agent with protective effects against pancreatic -cell damage from alloxan-induced diabetes
- **Respiratory conditions:** Including asthma, allergies, cough, bronchitis, emphysema, flu and congestion.

Homeopathic Infusion Additive

Mangosteen Pericarp

Contents: Homeopathic water distillation of Mangosteen pericarp / Garcinia mangostana L with trace grain alcohol used during processing.

In treatment of cancer, cancer prevention, herpes, staphylococcus aureus, tuberculosis, HIV/AIDS, high cholesterol, atherosclerosis, cardiovascular diseases, such as hypertension, stroke, and heart attack, thrombosis; diarrhea, dysentery, urinary disorders, highly anti-bacterial, anti-fungal, and anti-viral, gonorrhea, gleet, UTIs, thrush, and many bacterial diseases. Fever reduction, cystitis, amoebic dysentery, ischemic heart disease, anti-aging - promotes cell regeneration, helps reduce wrinkles, physical and mental deterioration, sciatica, periphery neuropathy, detoxification, osteoporosis, retina and eyes diseases, xerophthalmia (lack of vision in dim / dark light), pimples and acne.

Anti-cancer, cytoprotective, anti-bacterial, antioxidant, anti-fungal, anti-fatigue, anti-obesity, anti-depression, anti-anxiety, anti-vertigo (dizziness), anti-Alzheimer's, anti-Parkinsonism (Parkinson's Disease), anti-allergenic, anti-seborrheic (skin disease), anti-glaucoma (eye disease), anti-pyretic (anti-fever), anti-diarrhea, antiperiodontic gum disease), anti-pain (such as dental pain), anti-neuralgia (nerve pain), anti-arthritis, antiinflammatory (act as cox-2 inhibitors like the pharmaceutical drugs Vioxx and Celebrex, but without the deadly side-effects), and anti-ulcer (such as ulcers of the stomach, mouth, and intestines).

Mangosteen Pericarp

Contents: Homeopathic water distillation of Mangosteen pericarp / Garcinia mangostana L with trace grain alcohol used during processing.

In treatment of cancer, cancer prevention, herpes, staphylococcus aureus, tuberculosis, HIV/AIDS, high cholesterol, atherosclerosis, cardiovascular diseases, such as hypertension, stroke, and heart attack, thrombosis; diarrhea, dysentery, urinary disorders, highly anti-bacterial, anti-fungal, and anti-viral, gonorrhea, gleet, UTIs, thrush, and many bacterial diseases. Fever reduction, cystitis, amoebic dysentery, ischemic heart disease, anti-aging - promotes cell regeneration, helps reduce wrinkles, physical and mental deterioration, sciatica, periphery neuropathy, detoxification, osteoporosis, retina and eyes diseases, xerophthalmia (lack of vision in dim / dark light), pimples and acne.

Anti-cancer, cytoprotective, anti-bacterial, antioxidant, anti-fungal, anti-fatigue, anti-obesity, anti-depression, anti-anxiety, anti-vertigo (dizziness), anti-Alzheimer's, anti-Parkinsonism (Parkinson's Disease), anti-allergenic, anti-seborrheic (skin disease), anti-glaucoma (eye disease), anti-pyretic (anti-fever), anti-diarrhea, antiperiodontic gum disease), anti-pain (such as dental pain), anti-neuralgia (nerve pain), anti-arthritis, antiinflammatory (act as cox-2 inhibitors like the pharmaceutical drugs Vioxx and Celebrex, but without the deadly side-effects), and anti-ulcer (such as ulcers of the stomach, mouth, and intestines).

Mangosteen Pericarp

We're on your side, here to help

Compound IL

Homeopathic Infusion Additive

Some of the many benefits of Compound IL;

- **Cancer prevention:** Antioxidants from xanthone fight free radicals that cause cancers
- **Immunities booster:** Effective against herpes, staphylococcus aureus, tuberculosis, and HIV/AIDS
- **Cholesterol:** Helps increase good cholesterol (HDL) and reduce bad cholesterol (LDL) and triglycerides
- **Digestive disorders:** Treats, diarrhea, dysentery, and urinary disorders
- **Antioxidant:** Xanthenes are useful in treatment of oxidative stresses and prevention and treatment of cancer
- **Disease prevention and healing:** Highly anti-bacterial, antifungal properties, and anti-viral
- **Reproductive diseases:** Used in treatment of gonorrhoea, gleet, UTIs, thrush, and many bacterial diseases
- **Pain relief:** Cox-2 inhibitors are highly anti-inflammatory, naturally reducing pain
- **Fever:** Naturally reduces fever without preventing associated healing
- **Cardiovascular diseases:** Beneficial in ischemic heart disease, atherosclerosis, hypertension, and thrombosis
- **Anti-Aging:** The antioxidants promotes cell regeneration, help reduce wrinkles
- **Physical and mental deterioration:** Xanthenes prevent free radicals, and slow aging and degenerative diseases
- **Anti-inflammatory:** Especially useful in sciatica and periphery neuropathy
- **Detoxification:** Antioxidants bind toxins and chemicals from pollution, smoke, contaminated foods, and radiation.
- **Eyes:** Protects the retina and sharpens vision, helping prevent xerophthalmia (lack of vision in dim / dark light)
- **Pimples and Acne:** Anti-inflammation properties reduce inflamed acne and pimples

Xanthenes, isolated from the skin of the fruit, possess unique healing properties exclusive to mangostein pericarp. These include a tricyclic aromatic system, plus Isoprene, methoxyl, and hydroxyl groups that contain a diverse array of xanthone compounds, 50 of which are exclusive to the pericarp. The most abundant are α - and γ -mangostin, β -mangostin, gartanin, 8-deoxygartanin, garcinones A, B, C, D and E, mangostinone, 9-hydroxy calabaxanthone and iso mangostin, among others.

All of these produce remarkable healing properties, especially beneficial for those in which other medicines or therapies have failed. These are all highly beneficial in healing of various types of cancers and bacterial diseases.

Homeopathic Infusion Additive

Soursop

Contents: Homeopathic water distillation of leaves of Soursop / Annona Muricata, with trace grain alcohol used during processing.

Traditionally used in treatment of breast, liver, prostate, colorectal, pancreatic, lung, and colon cancers. Traditional medicinal uses of Soursop Leaf include treatments for fever, pain, respiratory and skin disease, internal and external parasites, bacterial infections, hypertension, inflammation, diabetes and most notably cancer. Also treats gout, soothes backpain, relieves stress, treats insomnia, depression and more.

More than 200 chemical compounds have been identified and isolated from Soursop Leaf, the most important are derived from alkaloids, phenols, and acetogenins. These bioactive compounds exhibit a wide array of strong healing properties such as immuno-modulatory, anti-inflammatory, anti-cancer, anti-parasitic, insecticidal, antimicrobial, neurotoxic, anti-leishmaniasis, antioxidant, anti-protozoan, larvicide, and cytotoxicity to tumor cells. And the list continues: anxiolytic, anti-stress, anti-inflammatory, anti-ulceric, antioxidant, anti-nociception, antihypotensive, hepato-protective, anti-icteric and antihypoglycemic activities.

Compound IP

Homeopathic Infusion Additive

- **Antioxidants** - help prevent cell damage and could lower the risk of chronic disease
- **Helps Kill Cancer Cells** - widely used for a variety of more difficult cancers
- **Helps Fight Bacteria** - effectively kills multiple types of bacteria, including strains that cause gingivitis, tooth decay, and yeast infections
- **Boosts Immunity** - antioxidant seek out free radicals and reduce the chances of oxidative stress in tissues and organs of the body
- **Diabetes** - helps stabilize blood sugar levels, beneficial for those with diabetes or hypoglycemia when paired with a healthy diet and active lifestyle
- **Improves Gastrointestinal Health** - anti-inflammatory components alleviate pain and irritation in the stomach and colon
- **Analgesic** - sedative and anti-inflammatory aspects and well known in world of natural medicine
- **Ulcer remedy** - reduces inflammation, kills pain, antibacterial in the gut, and speeds ulcer healing
- **Gout remedy** - inhibits xanthine oxidase, the principal reason for gout
- **Anti-Inflammatory** - contain phenolic compounds that reduce and often cure inflammation
- **Highly Anti-Parasitic** - helps rid the body of both digestive and blood parasites
- **Arthritis** - its high anti-oxidant content helps relieve inflammation and kill associated pathogens
- **Stress Reduction** - Buffers cortisol elevation, reduces anxiety and elevates sexual function
- **Insomnia remedy** - helps the brain to quiet when the body needs sleep

It is recommended that you don't consume soursop fruit or soursop leaves if you:

- Are taking blood pressure medication
- Are taking diabetes medication
- If you have severe liver or kidney disease
- If you are having any nuclear imaging studies performed
- If you have a very low platelet count.

Compound IS

Homeopathic Infusion Additive

Compound IS

Homeopathic Infusion Additive

Compound IS

Homeopathic Infusion Additive

Silver Hydrosol

Contents: Silver with a purity of 99.999 %, electrolyzed in double-distilled water.

Silver Hydrosol, often in combination with other BSI therapies, and when applied via IV infusion, and rarely via the oral route, has been successfully used in the treatments for appendicitis, arthritis, fungal infections that can also manifest as athletes foot and skin ailments, blood-borne parasites, many forms of cancer, candida, cholera, conjunctivitis, cystitis, dermatitis, eczema, encephalitis, fibrositis, genital yeast infections, gonorrhea, herpes, keratitis, leprosy, leukemia, lupus, lymphangitis, lyme disease, malaria, meningitis, neurasthenia, pleurisy, pneumonia, prostate infection, psoriasis, rhinitis, ringworm, scarlet fever, septic conditions (eyes, ears, mouth, throat), staph and strep infections, syphilis, thyroid infections, tonsillitis, urinary tract infections (UTIs), virus (including all forms of herpes), whooping cough, and a much longer list.

Silver kills over 650 disease-causing organisms, and resistant strains fail to develop, when used properly. When Silver Hydrosol is infused into the blood stream, the effects become more pronounced, and yet it remains non-toxic to the body. Silver Hydrosol is possibly the best choice in relation to emerging health conditions, in that the human body does not presently appear to be immune to the effects of silver unlike with antibiotic.

Silver Hydrosol

We're on your side, here to help

Compound IS

Homeopathic Infusion Additive

Silver Hydrosol was common in prescribed medical use until 1938. It was a highly successful mainstream antibiotic treatment then, and considered quite 'high tech.' The pharmaceutical industry moved in, causing colloidal research to be set aside in favor of financially lucrative antibiotics and other drugs. Many remember their grandparents putting silver coins in milk to prolong its freshness at room temperature. People who ate from silver utensils were generally healthier - how the wealthy survived ancient plagues. Silver Hydrosol has been reported in both ancient and modern medical texts as successfully used solely, or in conjunction with other therapies, to heal literally hundreds of conditions.

After testing 23 methods for water purification, NASA (The National Aero nautics and Space Administration) selected Silver Hydrosol for its space shuttles and the International Space Stations, because all water onboard is recycled, and there can be no risk of contamination from conventional drugs to other crew members, and full inoculation of water without worry of disease or side effect. NASA, as well as half the world's airlines, uses silver filters to guard against water-borne diseases onboard aircraft. A majority of BSI patients have tested positive for antibiotic resistance or immune deficiency (as evinced by fungus viewed in the blood under microscope - a condition caused by the use of antibiotics that kill off beneficial bacteria needed to consume fungus in the body).

For more than 15 years, the successful use of Silver Hydrosol serves in evidence that many diseases can be healed, when antibiotics and many other mainstream medicines have been coming largely ineffective, and indeed have highly decreased immune function in both humans and nature in general. Overuse of mainstream antibiotics has resulted in the emergence so-called Super Bugs. This has resulted in many pathogens rapidly becoming immune to conventional medicines, as is widely acknowledged by the mainstream medical community, with no modern alternative yet revealed. Presently used next generation antibiotics are actually chemotherapy agents, in that they actually alter DNA in humans and others living down-stream from human elimination.

The Herxheimer Effect on rare occasion, some people, when first ingesting Silver Hydrosol (and other healing agents such as DMSO / IV Vitamin C / EDTA), have experienced the so-called Herxheimer effect, a result of silver very efficiently neutralizing pathogens and stimulating immunities too fast for the body to dispose of through the normal elimination channels. This forces the body to utilize the secondary eliminative organs: lungs, sinuses, skin, and more. Experiences that may feel like a cold or the flu, diarrhea, cold shakes, etc. Lowering dosage (or completely abstaining for a day or so), or by continuing with lower doses, then gradually increasing while the body clears itself of pathogens, will often slow the healing process, but make it easier to endure.

Homeopathic Infusion Additive

Zingerberaceae

Contents: Homeopathic water distillation of four zingerberaceae-family roots: Temu lawak, kunyit kuning (turmeric), temu kunci, galangal, plus piper nigrum, silver hydrosol, with trace grain alcohol used during processing.

In treatment of diseases and aberrant growths of the liver, stomach, colon, breast, lung, prostate, blood, brain and more. Chronic inflammation including macular degeneration, cervix and uterine diseases. Helpful in blood and liver parasites, detox regimes, cancer, virus, fungus, and bacteria therapies. Anti-diabetic, hypolipidemic, anti-inflammatory, hepatoprotective, anti-asthmatic, and anti-cancerous. Works to neutralize diseased tissue, virus, fungus, bacteria, without killing healthy tissues. The penetrating action of the 48+ alkaloids distilled from these four ginger family roots spread through the body and into errant growths and pathogens, causing apoptosis. The zingiberaceae (ginger) family of plants, of which there are more than 400 varieties, is widely known for medicinal potency - the basic cure-all of all medicinal practices of India and Indonesia. Most of the 400 species are used in indigenous medicines, as well as vegetables, spices, dyes, condiments, and their exotic flowers as ornamentals.

Galanga is a more prominent root from the ginger family. It has been found to be a potent anti-carcinogen, and possess anti-inflammatory, analgesic, anti-allergic, antifungal, antidiabetic, antibacterial, anti-ulcer, anti-pyretic, immunostimulating, antioxidant, anti-amoebic, anti-dermatophytic and many other important properties. Galangal is a free radical scavenger, exhibiting strong superoxide, anion-scavenging activity.

Zingerberaceae

We're on your side, here to help

Zingerberaceae

Contents: Homeopathic water distillation of four zingerberaceae-family roots: Temu lawak, kunyit kuning (turmeric), temu kunci, galangal, plus piper nigrum, silver hydrosol, with trace grain alcohol used during processing.

In treatment of diseases and aberrant growths of the liver, stomach, colon, breast, lung, prostate, blood, brain and more. Chronic inflammation including macular degeneration, cervix and uterine diseases. Helpful in blood and liver parasites, detox regimes, cancer, virus, fungus, and bacteria therapies. Anti-diabetic, hypolipidemic, anti-inflammatory, hepatoprotective, anti-asthmatic, and anti-cancerous. Works to neutralize diseased tissue, virus, fungus, bacteria, without killing healthy tissues. Compound IZ

Homeopathic Infusion Additive

Temu Lawak is used for both food and medicinal purposes. Containing curcuminoid, the main component of rhizome of *Curcuma xathorrhiza*, temu lawak is highly anti-microbial, and works well against *Streptococcus mutans*, *Staphylococcus aureus*, *Salmonella*, and more.

Kunyit Kuning (turmeric) is used to treat a variety of internal disorders, such as indigestion, throat infections, common colds, or liver ailments, as well as topically to cleanse wounds or treat skin sores. Kunyit kuning is antifungal and antibacterial. Kunyit is also highly antioxidant, anti-inflammatory, anti-cancer, and plays an important role in prevention and treatment of various illnesses ranging notably from cancer to autoimmune, neurological, cardiovascular diseases and diabetes.

Temu Kunci is an excellent antioxidant, and used to help heal pancreatic, lung, prostate, colon, and breast cancers. It's anti-angiogenic, anti-HIV protease, and anti-photo aging. *Piper nigrum* (black pepper) or piperine increases the absorption of many medicines, (especially those of the ginger family). Piperine is antibacterial, anti-inflammatory, antilarval, antioxidant, anti-parasitic, and much more.

The more important alkaloids and beneficial nutrients of Compound IZ Injection Additive are...

curcumin (kunyit kuning)	p-cymene, (galangal)
demethoxycurcumin, (kunyit kuning)	1,8-cineole, (galangal)
bisdemethoxycurcumin, (kunyit kuning)	limonene, (galangal)
turmerone, (kunyit kuning)	y-terpinene, (galangal)
atlantone, (kunyit kuning)	linalool, (galangal)
zingiberene, (kunyit kuning)	borneol, (galangal)
curcuminoid (temu lawak)	terpinene-4-ol, (galangal)
germakren (temu lawak)	a-terpineol, (galangal)
allo-aromadendren (temu lawak)	geranyl acetate, (galangal)
isofurogermakren (temu lawak)	tricyclin (temu lawak)
tricyclin (temu lawak)	and β-caryophyllene, (galangal)
xanthorrhizol (temu lawak)	thymol, (galangal)
methyl eugenol, (galangal)	piperine1, (piper nigrum)
chavicol, (galangal)eugenol, (galangal)	alkamides9, (piper nigrum)
1'-acetoxycavichol acetate, (galangal)	piptigrine7, (piper nigrum)
catechin, (galangal)	wisanine7, (piper nigrum)
terpinen-4-ol, (galangal)	dipiperamide D10, (piper nigrum)
p-Coumaric acid, (galangal)	dipiperamide E10, (piper nigrum)
Myricetin, (galangal)	alpinetin (temu kunci)
a-pinene, (galangal)	boesenbergin A & B (temu kunci)
camphene, (galangal)	methoxychalcone (temu kunci)
sabinene, (galangal)	cardamonin (temu kunci)
	panduratin A (temu kunci)
	pinostrobin (temu kunci)
	pinocembrin (temu kunci)

Glutathione

Infusion Additive - Glutathione

Glutathione

Infusion Additive - Glutathione

Glutathione

Infusion Additive - Glutathione

Glutathione

Most every health condition can be improved with intravenous Glutathione, due to it's central role in immune biology. Unfortunately, glutathione is poorly absorbed through digestion, making IV administration the most effective way to raise glutathione to disease-reversing levels.

Glutathione is primarily responsible for collagen synthesis in the body, and with age, the ability to synthesize collagen decreases. Glutathione levels drop 1-2% for each year of age, and the ability to detoxify free radicals decreases (hence sagging skin, degrading joints, decreased mental and physical ability, etc).

By adding collagen to glutathione, the effects of glutathione are amplified when raw materials for syntheses become immediately available. Concentrated in the liver, Glutathione functions as a key detoxifying agent. Glutathione is considered a master antioxidant and plays a role in many functions.

Glutathione also maintains other antioxidants, including vitamins C and E, in their active or reduced forms. It is vital for the proper synthesis and repair of DNA, and numerous other critical biochemical pathways affecting every system of the body including the nervous and immune systems and liver function. Glutathione improves the liver's ability to remove countless toxins including heavy metals.

Glutathione

Infusion Additive - Gluathione

A few of the benefits of glutathione infusion;

- Stimulates and controls collagen production
- Boosts and balances the immune system
- Supports detoxification of pollutants from the body
- Regenerates mitochondria inside cells for energy
- Produces an anti-aging effect

Glutathione is an important antioxidant that combats free radicals, reducing oxidative stress and preventing damage to cells. We have witnessed many patients enjoy an improvement in Parkinson's symptoms including reduced tremor, increased flexibility, and more functionality.

Glutathione also maintains other antioxidants, including vitamins C and E, in their active or reduced forms. Collagen

Infusion Additive - Collagen

Collagen

Most every health condition can be improved with intravenous Collagen, due to it's central role in immune biology.

With age, the ability to synthesize collagen decreases. Levels drop 1-2% for each year of age, and the ability to detoxify free radicals decreases. After 60-70 years, collagen restoration virtually ceases (hence sagging skin, degrading joints, decreased mental and physical ability, etc).

Collagen is the most abundant structural protein of the human body, representing 33% of all body proteins, about 6% of total body weight. It's the main component of connective tissues. Collagen has great tensile strength, and is the main component of fascia, cartilage, ligaments, tendons, bone, and skin. Along with elastin and soft keratin, it is responsible for skin strength and elasticity, and its degradation leads to wrinkles that accompany aging. It strengthens blood vessels and plays a role in tissue development. It is present in the cornea and lens of the eye in crystalline form. The fibroblast is the most common cell that creates collagen.

Collagen

Infusion Additive - Collagen

A few of the benefits of collagen injection;

- Serves as the major catalyst for growth and repair of nearly all the body's tissues
- Improves the elasticity of the skin and to reduce wrinkles
- Reduces oxidative damage to joints, stimulates major decrease in joint pain, and swelling
- Rapidly reduces swollen and tender joints
- Promotes an increase in strength and muscle when used in conjunction with exercise
- Benefits from a better sleep (remember the body heals during.

Depending upon the degree of mineralization, collagen tissues may be rigid (bone), compliant (tendon), or have a gradient from rigid to compliant (cartilage). It is also abundant in corneas, blood vessels, the gut, intervertebral discs, and the dentin in teeth. In muscle tissue, it serves as a major component of the endomysium.

No known negative side effects are associated with injections of collagen.

ALA (Alpha Lipoic Acid)

Infusion Additive - Alpha Lipoic Acid

ALA (Alpha Lipoic Acid)

Infusion Additive - Alpha Lipoic Acid

ALA (Alpha Lipoic Acid)

Infusion Additive - Alpha Lipoic Acid

ALA (Alpha Lipoic Acid)

Alpha lipoic acid (ALA) is a key antioxidant and vital in most all body tissues. Referred to as the universal antioxidant, ALA supports other antioxidants, like vitamins C and E, and glutathione.

ALA is critical to mitochondrial replication. Mitochondria are tiny organelles inside human cells that help convert glucose to adenosine triphosphate, the energy molecule. Mitochondrial dysfunction is linked to aging and chronic disease in humans.

ALA is also fundamental to the breakdown of amino acids, the essential elements of proteins that are vital to new cell production. As we age, cellular turnover naturally slows. Insufficient levels of lipoic acid can reduce old cell replacement, which speeds aging.

When delivered via intravenous drip therapy, bypassing digestion, it quickly and efficiently enters depleted cells throughout the body for immediate use. For the treatment of serious diseases and health conditions, IV therapy is the delivery method of choice.

ALA (Alpha Lipoic Acid)

Infusion Additive - Alpha Lipoic Acid

Anti-aging: ALA's powerful antioxidant properties fight oxidative stress and protect cells from damage, slowing the aging process. ALA also fights systemic inflammation which is a major contributor to metabolic disorders like heart disease, hypertension, and diabetes.

Weight loss: ALA enhances glucose metabolism. Greater energy expenditure helps reduce fat stores and rev up your metabolism.

Vision health: ALA fights oxidative stress that damages optical nerves and cause eye-related disorders like retinal damage, macular degeneration, glaucoma, cataracts, and vision loss.

Liver health: ALA promotes liver health by protecting liver cells from oxidative stress damage and supporting the neogenesis of new liver cells. ALA fights many liver problems, including hepatitis B and C, autoimmune hepatitis, primary biliary cirrhosis, and other liver conditions.

Reversal of Type II diabetes and peripheral neuropathy: ALA improves insulin sensitivity of the cells, enabling them to use circulating glucose for energy production, thereby lowering your blood sugar. Effective in treating conditions associated with diabetes, including diabetic peripheral neuropathy.

Slows or stops cancer cell growth: Multiple studies have found ALA to be beneficial in the treatment of cancer. ALA has been shown to decrease the proliferation of cells in breast, ovarian, colorectal, and lung cancer. It also appears to slow the progression of pancreatic and thyroid cancer, and to enhance the efficacy of chemotherapy.

Treatment of dementia and cognitive decline: ALA penetrates the blood-brain barrier in protection of the mitochondria in brain tissue. Helpful to Alzheimer's, and others suffering from memory loss, motor impairments, and reduced cognitive function. ALA also beneficial in treatment of multiple sclerosis.
