Regular Price : Rp. 1.435.000
Less 15% Senior discount
Rp. 1.220.000

Ingredients Suggested Combination

- 1-3 gr or 5-10 gr Vitamin C
- Ringers Lactate Electrolytes
- Piracetam
- Glutathione
- Homeopathic Compound IL (Mangosteen Pericarp) - 4cc
- IBX (B1-B2-B3-B5-B7-B12)

Oral Supplements

- Compound NBH Nootropics Brain Health Herbal Capsules

Day 1
**Brain
& Nerves**

Regular Price : Rp. 1.424.000
Less 15% Senior discount
Rp. 1.210.000

Ingredients Suggested Combination

- 1-3 gr or 5-10 gr Vitamin C
- Ringers Lactate Electrolytes
- Collagen
- Glutathione
- Magnesium
- Homeopathic Compound IZ (Zingerberaceae) - 4cc Zinger Upper

Oral Supplements

- Compound ADP-A Stress & Endurance Adaptogens -or-
- Compound ADP-B Berberine Longevity Adaptogens Herbal Capsules

Day 8
**Strength
& Stamina**

Regular Price : Rp. 1.734.000
Less 15% Senior discount
Rp. 1.474.000

Ingredients Suggested Combination

- 1-3 gr or 5-10 gr Vitamin C
- Ringers Lactate Electrolytes
- ALA - Alpha Lipoic Acid
- Glutathione
- Chondroitin Sulfate

Oral Supplements

- Compound AGE: Anti Aging Support for Skin, Bones, Fascia, Muscle, and Body Herbal Capsules and / or
- Compound BON: Bone, Ligament & Joint Builder Herbal Capsules

Day 16
**Anti-Aging
& Bones**

Regular Price : Rp. 1.935.000
Less 15% Senior discount
Rp. 1.645.000

Ingredients Suggested Combination

- Vitamin C 3 gr or 15 gr
- Ringers Lactate Electrolytes
- Lysine (pre-cursor for L Carnitine)
- L-Carnitine
- Homeopathic Compound IN (Nigella Sativa)
- IB3 (B1-B6-B12)
- * Optional NAD+ 100 mg

Day 24
**Skin
& Immunities**

4 IVs over 4 weeks. Each week addresses different aspects related to aging and the mitigation of its effects...

- Day 1 : Brain & Nerves
- Day 8 : Strength & Stamina
- Day 16 : Anti-Aging & Bones
- Day 24 : Skin & Immunities

Regular Price
~~Rp. 6.528.000~~

Rp. 5.549.000

Discount**

Member patients may receive higher dosages. Although we recommend the prescription be followed as displayed here, the patient and doctor may change combinations as needed for the highest individual benefit.

*Discount applies to this package only. No additional discounts may be applied.

First Time
Rp. 753.000

1 gram / 1,000 mg of Vitamin C

Other Times
Rp. 788.000

3 grams / 3,000 mg of Vitamin C

Ingredients

- Sodium Ascorbate Vitamin C, 1-3 grams / 1,000 – 3,000 mg
- Vitamins B1, B6, B12
- Ringer's Lactate infusion medium

Oral Supplements

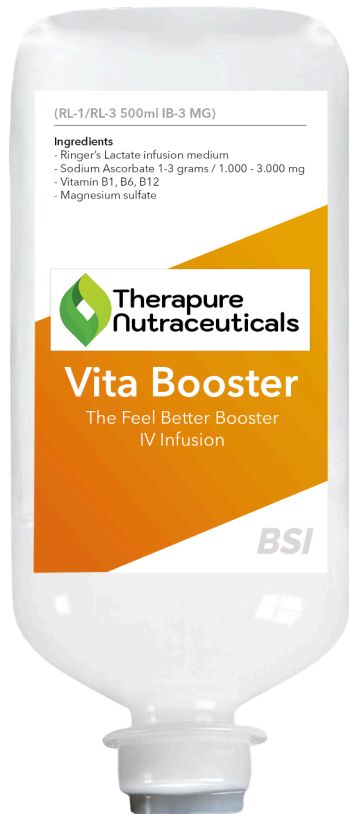

- Ascorbic Acid Vitamin C (increases the effect of the infusion)
- Compound M2 (72+ types of colloidal trace minerals)

Best price, best quality from BSI Not-For-Profit Clinics. In a hurry, small budget, but need a boost, or maybe just want to see what IV therapy is all about. Instant re-hydration and vitamin boost, with 1 or 3 grams of vitamins C and B complex.

In only 90 relaxing minutes, Vita Basic provides a quick hit of vitamin C sodium ascorbate, B complex vitamins B1, B6, B12 in 500 ml of pure water with sodium chloride (to balance pH and to replenish salt lost through perspiration, work-out, or hot Bali days and nights).

1-3 grams of vitamin C, injected directly into the blood, is the equivalent of taking 2-6 each of 500 milligram tablets of oral vitamin C. The important difference is that intravenous vitamin C is fully utilized, not partially discarded by digestion when taken orally. And vitamin C via infusion is also medicinal, just as much as it is nutritional. Vitamin C (ascorbic acid) is very close to glucose sugar genetically. When a cell uptakes glucose (the basic nutrient needed by all cells of the body) it grows and also produces acids or other wastes (that eventually become urine). However when a virus/bacteria/fungus and other pathogen (bio-entity of low pH) uptakes vitamin C, it instead produces hydrogen peroxide (oxygenated water), which makes the cell burst, bathing other cells around with oxygen, basically killing disease.

On very rare occasion, some people, when first receiving intravenous infusions, have experienced the so-called Herxheimer Effect, a result of infusions very efficiently neutralizing pathogens and occasionally stimulating immunities too fast for the body to dispose toxins through normal elimination channels. This forces the body to utilize the secondary eliminative organs: lungs, sinuses, skin, and more. Experiences that may feel like a slight cold or the flu, loose bowels, shivers, etc. The skin may eliminate stored toxins, perhaps producing minor, temporary skin eruptions – all part of elimination of toxins that cause premature aging and skin problems, and are considered beneficial reactions, in that the immune system has been activated, and is working to heal from pathogens and toxins.

First Time
Rp. 805.000

1 gram / 1,000 mg of Vitamin C

Other Times
Rp. 840.000

3 grams / 3,000 mg of Vitamin C

Ingredients

- Sodium Ascorbate Vitamin C, 1-3 grams / 1,000 – 3,000 mg
- Vitamins B1, B6, B12
- Magnesium sulfate (relaxes and calms)
- Ringer's Lactate infusion medium (4 electrolytes salts)

Oral Supplements

- Ascorbic Acid Vitamin C (increases the effect of the infusion)
- Compound M2 (72+ types of colloidal trace minerals)
- Jamu Jo No. 17 Citrus Turmeric

The Vita Booster IV infusion is formulated to help alleviate chronic symptoms associated with inflammation, fatigue, and stress. With the perfect blend of multivitamins and hydration, this infusion, and four types of complimentary oral supplements, also increases immune support, alleviates tension, migraines, muscle cramps and more. Relax with this restorative 90 minute infusion, while feelings of anxiety and tension simply, quietly fade from view.

Vita Booster is an advanced Myer's Cocktail formulation, originally designed for maintaining good health. The Vita Booster hydrating vitamin and nutrient IV contains an extra high dose of vitamin C (1-3 grams / 1,000 – 3,000mg total) coupled with minerals, antioxidants, and electrolytes giving an instant boost to the immune system, while increasing strength and energy.

The Vita Booster Feel Better Infusion with four types of electrolytes, magnesium, Vitamin C you will feel better. Great for most everything. Feel the power of natural energy produced IV super B's mix. The family of B vitamins are used in just about every chemical reaction in the body, especially when it comes to producing energy, detoxifying the body, and mental clarity.

Rp. 1.350.000 up to 1.933.000

1 – 3 grams / 1000 – 3000 mg of Vitamin C

Ingredients

- Sodium Ascorbate Vitamin C, 1-3 grams / 1,000 – 3,000 mg
- Vitamins B1, B2, B3, B5, B6, B12
- Vitamin D injection (optional)
- Glutathione
- NAC (N-Acetyl Cysteine) 3 cc (**Doctor prescription required, included**)
- Magnesium sulfate (relaxes and calms)
- Ringer's Lactate infusion medium (4 electrolytes salts)

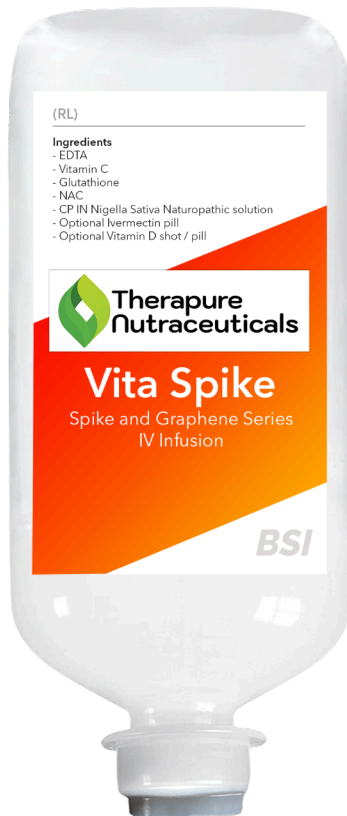

Oral Supplements

- Jamu Jo 14 Star Anise 250ml (shikimic acid for spike protein)
- Jamu Jo 15 Sambiloto 250ml (shikimic acid for spike protein)
- Ascorbic Acid Vitamin C (increases the effect of the infusion)
- Compound M2 (72+ types of colloidal trace minerals)

The Vita Covid IV Infusion Package is designed for both the vaccinated and un-vaccinated, and those who are suffering from Covid symptoms, as well as in prevention – if there is concern about exposure or shedding. Greatly boosts immunities, while lessening symptoms and contagion to and from others.

The Vita Covid Infusion is suggested to be taken repeatedly until symptoms have passed, generally once each two days. A maximum of 4 or 5 Vita Covid IV infusions with added oral tonics and vitamin D shot, may be needed in severe cases. Vitamin D need not be taken more than once each 5 days. The patient can remove and add items as desired, however we strongly suggest the package be taken as prescribed for best effect. The BSI doctor is available Monday through Friday for consultation.

Rp. 1.460.000 up to 2.465.000

1 – 3 grams / 1000 – 3000 mg of Vitamin C

Ingredients

- EDTA (**Doctor prescription required, included**)
- Vitamin C
- Glutathione
- NAC (**Doctor prescription required, included**)
- Compound IN Nigella Sativa Naturopathic solution
- Ringer's Lactate
- Optional Vitamin D shot or pill

Oral Supplements

- Jamu Jo 14 Star Anise (250 ml)
- Compound SIP (capsule)

Bath

- Neem Boron Soap and Scrub (optional – as needed)
- Vita Mineral Bath with CP SO oils (optional – as needed)

Not for healing the so-called Covid-19 virus, but for clearing spike protein action and graphene derivatives from the body. For virus and sickness associated with Covid-19, consider instead the Vita Covid IV Infusion. May we suggest blood testing, and viewing of blood under microscope in verification of graphene derivatives, micro-tech, and abnormal clotting.

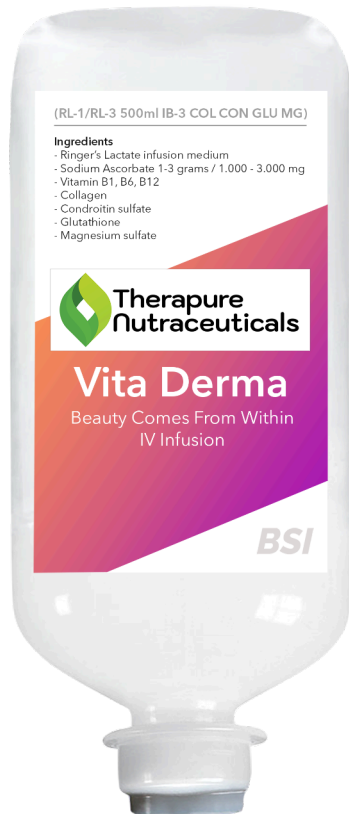

The Vita Spike IV and Medicines Series stops spike protein synthesis, breaks up clots and related blockages, and clears toxins from the liver and the vascular system. EDTA chelation, with vitamins and herbs that combat spike synthesis and clear related toxins from the body. In more severe cases, a longer period of therapy may be suggested, depending upon subsequent live blood microscope observations and lab testing.

Normally between four and seven infusions are prescribed, plus oral medicines, depending on severity.

The Vita Spike IV Infusion Package is designed for both the vaccinated and un-vaccinated, and those who are suffering from graphene variations exposure and mRNA effects. Greatly boosts immunities, while lessening symptoms and contagion to and from others.

The Vita Spike Infusion and medicines package is suggested to be taken repeatedly until symptoms have passed, generally once each two days. A maximum of 4 or 5 Vita Spike IV infusions with added oral tonics and optional vitamin D shot, may be needed in severe cases. Vitamin D need not be taken more than once each 5 days. The patient can remove and add items as desired, however we strongly suggest the package be taken as prescribed for best effect. The BSI doctor is available Monday through Friday for consultation.

First Time
Rp. 1.322.000

1 gram / 1,000 mg of Vitamin C

Other Times
Rp. 1.357.000

3 grams / 3,000 mg of Vitamin C

Ingredients

- Sodium Ascorbate Vitamin C
- Vitamins B1, B6, B12
- Collagen
- Chondroitin sulfate (**Doctor prescription required, included**)
- Glutathione
- Magnesium sulfate
- Ringer's Lactate

Oral Supplements

- Ascorbic Acid Vitamin C
- Compound M2 Minerals

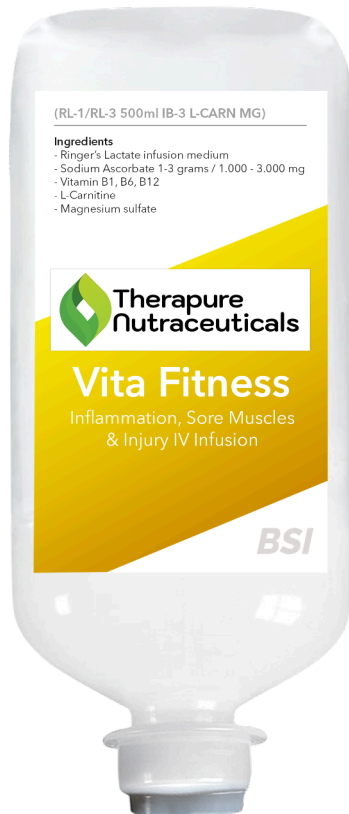

Beauty is so much more than skin deep. In fact skin is the first indicator of internal health. Vita Derma tones and strengthens sub-dermal tissues that support and grow healthy skin, and as such, 1 gram / 1,000 mg or 3 grams / 3,000 mg of vitamin C, along with collagen, glutathione, and chondroitin sulfate instantly work to tighten skin, strengthen bones and joints, reduce blood vessel plaque and liver damage. Vita Derma is ultimately youth-giving / age-defying.

Glutathione is an antioxidant made of amino acids produced by the liver, and via IV is an excellent form of anti-aging skin care. Helps to eliminate age spots, liver spots, brown spots, lentigines, crows feet, and dark circles under eyes, and protects the skin against oxidation damage. Supplementation is highly beneficial for those over 45.

BSI chondroitin is 100% absorbable, and fully useable by all parts of the body. It's locally made from animal cartilage of a wide variety of ocean fishes known as the Greater lamnidae isurus. These agile, free-swimming predator fish do not have bones per se, but do possess extreme permanent flexibility due to their cartilage-based internal structure – they essentially do not age – are highly active until their end.

We generally recommend 2 the first week, then twice per month or as desired. Also consider adding BSI Orange-Lemon or Neem-Rosemary Deep Cleaning Soap, with Vita Scrub full skin mineral and vitamin scrub. Vita Lotion gives a huge shot of deep nutrition, for skin and scalp damaged by sun, environment, and time. Vita Bath and SOS bath salts give deep glowing health to skin and scalp via true natural nutrition.

- Promotes skin elasticity
- Binds bones to muscles
- Protects internal organs against degeneration
- Provides structure to joints and tendons
- Eases joint and muscle pain
- May reverse skin aging when used consistently
- Helps reduce cellulite

First Time
Rp. 977.000

1 gram / 1,000 mg of Vitamin C

Other Times
Rp. 1.012.000

3 grams / 3,000 mg of Vitamin C

Ingredients

- Sodium Ascorbate Vitamin C
- Vitamins B1, B6, B12
- L-Carnitine (**Doctor prescription required, included**)
- Magnesium sulfate
- Ringer's Lactate

Oral Supplements

- Ascorbic Acid Vitamin C
- Compound M2 Minerals
- Jamu Jo No. 17 Citrus Turmeric 250 ml

Recover from inflammation, sore muscles, and injury with anti-inflammatory L-Carnitine, vitamin C, magnesium, and electrolytes. Allows muscles to relax and speed proper healing.

Designed for both pre and post-workout, Vita Fitness helps quickly neutralize acids and reduce pain, while re-hydrating and relaxing not just muscle, but also joints, nerves, skin, and even eyes. Re-hydration with electrolyte salts, just like in sports drinks, magnesium to slowly relax the entire body (a trace mineral usually deficient in food). The most impressive benefits of L-Carnitine include improved heart health, brain function, more rapid body building, and most significantly, desired weight loss, among others. L-Carnitine helps transport fatty acid to mitochondria where they are subsequently converted into energy. This means fat becomes more difficult to accumulate in the body for a few days.

Get pumped with 100% nutrient absorption. Vita Fitness is perfect for professional and amateur athletes because it's a balanced combination of vitamins and minerals in fully absorbable IV electrolytes hydration, to aid in rapid healing, diminish soreness, and increase energy. It's all about quick and effective recovery, and retention of hard-fought gains. Enables sound sleep and prepares the athlete for the next even stronger round. Sport & fitness activities such as a marathon, triathlon, or Mixed Martial Arts (MMA) /cross-fit training, and more generate lactic acid build up and deplete hydration. Vita Fitness IV therapy also delivers mineral salts, antioxidants, and electrolytes to detoxify and re-energize after exercise or general fatigue.

- Restores hydration
- Re-balances body salts
- Flushes lactic acid
- Detoxification
- Optimal athletic performance
- Recovery from exhausting activity
- Reduces non-beneficial inflammation

First Time
Rp. 914.000

1 gram / 1,000 mg of Vitamin C

Other Times
Rp. 949.000

3 grams / 3,000 mg of Vitamin C

Ingredients

- Sodium Ascorbate Vitamin C
- Vitamins B1, B6, B12
- Silver hydrosol (**Doctor prescription required, included**)
- Magnesium sulfate
- 1 or 2 bottles of Ringers Lactate

Oral Supplements

- Ascorbic Acid Vitamin C
- Compound M2 Minerals

Sometimes we just become too busy, with too little time to guard health and build strong immunities. Age-old remedies vitamin C and silver hydrosol work in consort to control a wide variety of low-grade pathogens in the body. Intravenous vitamin C is strengthened by silver hydrosol, together becoming highly anti-bacteria, anti-fungus, anti-virus, and anti-parasite.

Vitamin C and Silver Hydrosol work together to control a wide variety of low-grade pathogens in the body. Vitamin C is strengthened by Silver Hydrosol, together becoming highly anti-bacteria, anti-fungus, anti-virus, and anti-parasite. BSI is the only clinic in Indonesia licensed to infuse Silver. We have proven Silver Hydrosol highly effective for killing blood-borne diseases, and those infecting the liver, kidneys, the genital tract, the lymphatic system, and even the brain. Colds, flu, arthritis, and many other diseases are quickly remedied when Silver Hydrosol is combined with vitamin C, B complex, magnesium, and BSI medicinal oral compounds, and more.

Dating back to ancient times, silver was also a popular remedy to stop the spread of diseases. Its use as a natural antibiotic continued all the way until the 1940s, when modern antibiotics arrived. Now BSI offers the only injectable silver hydrosol in Indonesia.

- Anti-bacteria and antimicrobial
- Re-hydrates with electrolytes
- Anti-virus, anti-fungus
- Anti-inflammatory
- Colds and flu
- Pneumonia
- Strep Throat
- Urinary Tract Infections (UTIs)

First Time
Rp. 914.000

1 gram / 1,000 mg of Vitamin C

Other Times
Rp. 949.000

3 grams / 3,000 mg of Vitamin C

Ingredients

- Sodium Ascorbate Vitamin C
- Vitamins B1, B6, B12
- EDTA 0.25 gram (**Doctor prescription required, included**)
- Ringer's Lactate

Oral Supplements

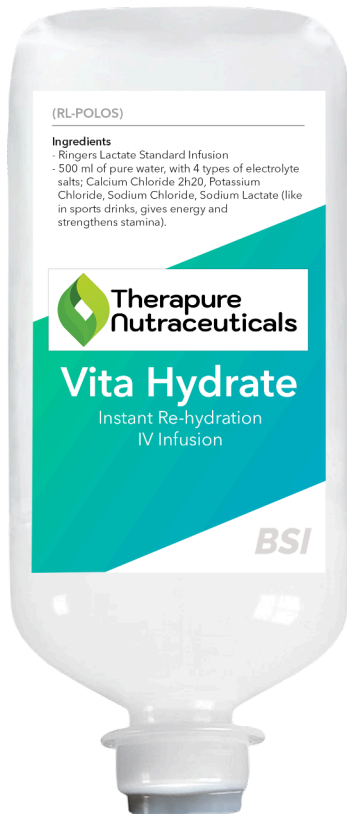

- Ascorbic Acid Vitamin C
- Compound M2 Minerals

Intravenous EDTA (ethylene diamine tetra-acetic acid), with Vitamin C. Initially introduced in 1914 to remove mercury from coal miners, the U.S. Food and Drug Administration has approved the use of chelation therapy with EDTA for treatment.

EDTA chelation therapy is primarily prescribed for the removal of heavy (and light) metals, especially mercury, lead, aluminum, radioactive isotopes, as well as plaque build-up on artery walls and heart capillaries, de-calcification of the pituitary gland (from fluoride), and more. These unwanted minerals interfere with enzyme function, nerve and brain function, heart and lung function, skin health, hair growth, immunities, mood, and tend to promote free radical damage.

Potential benefits of BSI IV chelation:

- Prevents cholesterol deposits
- Reduces blood cholesterol levels
- Lowers high blood pressure
- Helps avoid bypass surgery
- Helps avoid angioplasty
- Removes atherosclerotic plaques
- Dissolves intra-arterial blood clots
- Normalizes cardiac arrhythmia
- Has an anti-aging effect
- Increases intracellular potassium
- Improves heart function
- Removes mineral and drug deposits
- Dissolves kidney stones
- Reduces serum iron levels
- Reduces heart valve calcification
- Reduces varicose veins
- Heals calcified necrotic ulcers
- Reduces intermittent claudication (cramping)
- Improves vision in diabetic retinopathy
- Decreases macular degeneration
- Dissolves small cataracts
- Eliminates heavy metal toxicity
- Makes arterial walls more flexible
- Prevents osteoarthritis
- Reduces rheumatoid arthritis symptoms
- Lowers diabetics' insulin needs
- Reduces Alzheimer-like symptoms
- Reduce stroke/heart attack after-effects
- Helps prevent cancer
- Helps improve memory
- Reverses diabetic gangrene
- Restores impaired vision
- Detoxifies snake and spider venoms

First Time
Rp. 460.000

Ingredients

- 1 or 2 bottles of Ringers Lactate. Which includes: 500 ml of pure water, with 4 types of electrolyte salts; Calcium Chloride 2h20, Potassium Chloride, Sodium Chloride, Sodium Lactate (like in sports drinks, gives energy and strengthens stamina).

Vita Hydrate IV Infusion provides instant re-hydration in 500 milliliters of pure water with vital electrolytes.

We recommend this infusion first for those who are heavily hung-over, dehydrated, or who are very sick with fever. The Vita Hydrate infusion, when taken before all other infusions, will limit the so-called Herxheimer effect, that sometimes happens if IV nutrition is taken too soon when toxic from drugs or alcohol. A person may experience reactions such as fever or shaking when organic vitamins taken via intravenous infusion if he or she is highly toxic from drugs or alcohol, or with fever. So, if in doubt, start with the Vita Hydrate.

By the time thirst is felt+, 2% of energy is already lost. Waiting just ten minutes after becoming thirsty, 5% of energy can be lost. In cases of severe dehydration, 50% of available energy may be lost, and simple walking and sequential thinking may be at best difficult. And when a body is severely dehydrated, simple oral water consumption may not be enough to adequately quench thirst.

500 milliliters of pure water and electrolytes gives instant, effective re-hydration. Receive immediate relief, while quickly providing kidneys with vital hydration to prevent crystallization, kidney stones, and importantly, urinary tract infection. Kidneys, without adequate hydration, cannot fully remove acids and wastes from the body, and easily become infected.

Severe dehydration can result from heavy drinking, surfing under full sun, physical labor in the hot Bali sun, extended illness such as stomach flu, high fever, etc. Symptoms include dry skin / lips, constipation, strong or heavy urine, over-heated body without perspiring, sudden loss of energy, spinal pain, kidney pain, and more.

In severe cases, consider receiving two infusions back-to-back, depending on how deep the dehydration (it's okay to decide before the first 500 ml bottle has finished).

First Time
Rp. 1.460.000

- Compound M2 Minerals

Vita Joints IV Infusion is a powerhouse of healing agents for both prevention and healing of osteopathic diseases.

Collagen is the most abundant structural protein of the human body, representing 33% of all body proteins, about 6% of total body weight. It's the main component of connective tissues. Collagen has great tensile strength, and is the main component of fascia, cartilage, ligaments, tendons, bone, and skin. Along with elastin and soft keratin, it is responsible for skin strength and elasticity, and its degradation leads to wrinkles that accompany aging. It strengthens blood vessels and plays a role in tissue development.

Chondroitin sulfate is the basic structural component of cartilage, and provides protection from compression or breakage – a most visible example is the harder but flexible parts of the ear. Chondroitin sulfate is widely used in treatment of osteoarthritis, heart disease, cataracts, and alleviation of vaccination (blood clotting) side effects. Chondroitin promotes water retention within joints and tendons, increases resiliency by acting as a lubricant, and a means to absorb shock. Body builders tend to use chondroitin to speed recovery and strengthen body structures.

Glutathione is primarily responsible for collagen synthesis in the body, and with age, the ability to synthesize collagen decreases. Glutathione levels drop 1-2% for each year of age, and the ability to detoxify free radicals decreases. After 60-70 years, collagen restoration virtually ceases (hence sagging skin, degrading joints, decreased mental and physical ability, etc).

Magnesium is required to produce energy from carbohydrates, proteins, and fats. It's essential for proper DNA cellular function. Magnesium is also crucial in production of the antioxidant glutathione.

Oral Supplements

- Ascorbic Acid Vitamin C
- Compound M2 Minerals

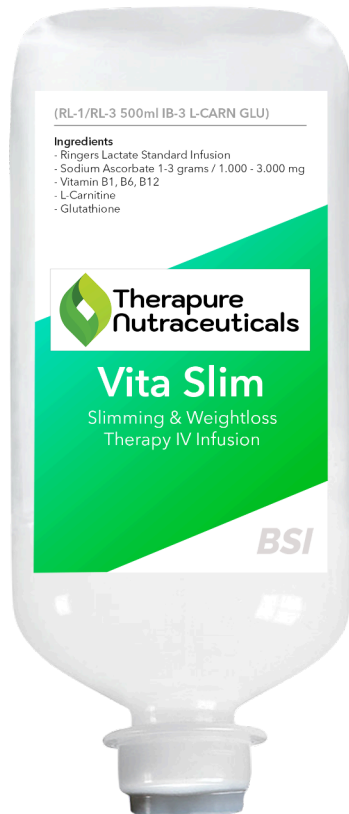

Silver hydrosol is anti-bacteria, anti-fungus, anti-virus, anti-parasite.

Vita Silver IV Infusion is designed to help alleviate cold and flu symptoms in their earliest stages. Silver hydrosol is also known as nano or colloidal silver, and is anti-bacteria, anti-fungus, and anti-virus. With 3 grams of vitamin C, electrolytes, and magnesium, B vitamins and more, Vita Silver is proven an unbeatable remedy for a wide variety of low-grade ailments.

Aboard the International Space Station (the ISS), the only anti-pathogenic allowed is silver hydrosol. This is because the ISS water supply is 100% recycled, and there can be no risk of modern pharmaceuticals (or disease) contaminating others on board. It is also used to purify ISS water and air.

We have proven silver hydrosol highly effective for killing blood borne diseases, and those infecting the liver, kidneys, the genital tract, and the lymphatic system. Colds, flu, arthritis, and many other diseases are quickly remedied when appropriate amounts of silver hydrosol are combined with vitamin C, B complex, magnesium, nigella sativa (black cumin), and BSI medicinal oral compounds. BSI is the only clinic in Indonesia licensed to infuse silver.

- Anti-bacteria and antimicrobial
- Helps heal psoriasis and eczema
- Pink eye and ear infections
- Anti-virus, anti-fungus
- Anti-inflammatory
- Colds and flu
- Urinary tract infections (UTIs)
- Anti-cancer
- Inhibits Hepatitis B and C

Ingredients

- Sodium Ascorbate Vitamin C
- Vitamins B1, B6, B12
- L-Carnitine – bolus (**Doctor prescription required, included**)
- Glutathione
- Ringer's Lactate

Oral Supplements

- Ascorbic Acid Vitamin C
- Compound WGT (Weightloss Support Non-Caffeine Formula)
- Compound M2 Minerals

The most impressive benefits of L-carnitine in Vita Slim IV Infusion include improved heart health, brain function, more rapid body building, and desired weight loss, among others. The main role of L-carnitine in the body is to initiate mitochondrial function and energy production in cells. It helps transport fatty acids to mitochondria where they are subsequently converted into energy. Most people use acetyl-L-carnitine to enhance their cognition and rev up energy levels. Repeated short-term use of L-Carnitine slow the metabolism of carbohydrates converting to fats. The human body makes enough L-carnitine under normal conditions. Older people and kidney disease patients often lack L-carnitine and might as such require supplementation.

- Combats depression
- Reduces conversion of carbohydrates to fats (great for weight loss)
- Helps heal Alzheimer's disease
- Helps reverse brain and nerve damage
- Improves fertility and sexual function
- Reduces chronic fatigue
- Helps with weight loss while enhancing muscle development
- Helps combat heart disease
- Slows aging
- No matter what your fitness goals are, whether it's losing fat or gaining muscle mass, your chances of success can greatly increase with L-carnitine.

Glutathione also maintains other antioxidants, including vitamins C and E. It is vital for the proper synthesis and repair of DNA, and numerous other critical biochemical pathways affecting every system of the body including the nervous and immune systems, and liver function. Glutathione improves the liver's ability to remove countless toxins including heavy metals. Supplemental glutathione also reduces food cravings while stimulating the body to increase muscle mass.

Rp. 633.000

Ingredients

- Vitamins B1, B2, B3, B5, B6, B12
- Ringer's Lactate

Cannot take more than once each two weeks, unless otherwise prescribed the a BSI Practitioner.
Contains vitamins B-1, B-2, B-3, B-5, B-6, B12.

Helpful the following conditions and more: Weakness, tiredness, or lightheadedness; Heart palpitations and shortness of breath; Pale skin; Nerve problems like numbness or tingling, muscle weakness, and problems walking; Vision loss; Mental problems like depression, memory loss, or behavioral changes.

A long list of benefits of 6 types of B vitamins include cell health. growth of red blood cells. increased energy. improved eyesight. heightened brain function. proper digestion and appetite function. and proper nerve function, among dozens of others.

Ringer's Lactate infusion medium is on the World Health Organization's List of Essential Medicines, which are the safest and most effective medicines required in health care.

This IV infusion does not contain vitamin C.
You may combine other ingredients per the ala carte menu.

First Time
Rp. 661.000

Ingredients

- Ringer's Lactate
- Glutathione

Glutathione is primarily responsible for collagen synthesis, and the decrease of free radicals that are responsible for sagging skin, degrading joints, decreased mental and physical ability, etc.

Glutathione is primarily responsible for collagen synthesis in the body, and with age, the ability to synthesize collagen decreases. This levels drop 1-2% for each year of age, and the ability to detoxify free radicals decreases (hence sagging skin, degrading joints, decreased mental and physical ability, etc).

Ringer's Lactate infusion medium is on the World Health Organization's List of Essential Medicines, which are the safest and most effective medicines required in health care.

This IV infusion does not contain vitamin C.
You may combine other ingredients per the ala carte menu.

First Time
Rp. 460.000

Ingredients

- 1 or 2 bottles of Ringer's Lactate. Which includes: 500 ml of pure water, with 4 types of electrolyte salts; Calcium Chloride 2h20, Potassium Chloride, Sodium Chloride, Sodium Lactate (like in sports drinks, gives energy and strengthens stamina).

Calcium Chloride 2h20, Potassium Chloride, Sodium Chloride, and Sodium Lactate, in pure water.

Ringer's Lactate is on the World Health Organization's List of Essential Medicines, which are the safest and most effective medicines required in health care.

This IV infusion does not contain vitamin C.
You may combine other ingredients per the ala carte menu.

RL is an isotonic fluid, meaning that it has the same osmotic pressure, or weight, as blood. Osmotic pressure is a measure that takes into account the electrolytes in water. About 1 liter of RL is sufficient to restore blood volume to its normal levels.

RL also provides the body with sodium lactate, which it can use as fuel in conditions of reduced or restricted blood flow and oxygen.

As an alkalizing agent, RL also helps reduce the levels of acidity within the body. Therefore, doctors may use the solution to treat high acid levels resulting from sepsis or other conditions.

A BSI Practitioner may administer RL alone or alongside other medications or nutrients, per the ala carte menu.

Rp. 512.000

Ingredients

- Ringer's Lactate
- Magnesium sulfate

Intravenous magnesium has uses in both mild and severe medical problems like Migraines, medication side effects, asthma attacks, high blood pressure, pre-eclampsia of pregnancy, and bad heart rhythms. It is estimated that 50% of people are magnesium deficient.

Ringer's Lactate is on the World Health Organization's List of Essential Medicines, which are the safest and most effective medicines required in health care.

This IV infusion does not contain vitamin C.
You may combine other ingredients per the ala carte menu.

First Time
Rp. 750.000

Ingredients

- Ringer's Lactate
- N-Acetyl Cysteine (NAC) (Doctor prescription required, included)

Intravenous NAC helps heal a wide variety of chronic respiratory conditions, fertility, and brain function, mood disorders, sleep, infections and inflammation. NAC is also indicated for reduction of spike protein production associated with nano-graphene replication, related to Covid diseases. Boosts glutathione which lessens oxidative stress associated with chronic disease.

N-acetyl cysteine (NAC) is a nutritive supplement form of cysteine. The adequate consumption of cysteine, in the form of NAC, is important for a variety of health reasons — including replenishment of the most powerful antioxidant, glutathione.

Ringer's Lactate is on the World Health Organization's List of Essential Medicines, which are the safest and most effective medicines required in health care.

This IV infusion does not contain vitamin C.
You may combine other ingredients per the ala carte menu.

First Time
Rp. 860.000

Ingredients

- Ringer's Lactate
- 100 mg of pure NAD+ (Nicotinamide adenine dinucleotide)

Simple NAD+ Therapy. For the purist seeking simple and effective nerve and brain healing and core energy enhancement.

100 mg in Ringer's Lactate, with no additional ingredients, at the right price.

Simple NAD+ IV Treatment for

- Brain & Nervous System Function
- Improved Mental Focus and Memory
- Boost Energy and Stamina
- Anti-Aging / Youth Preservation
- and more...

Nicotinamide adenine dinucleotide (NAD) is a coenzyme found in every cell in the body. It balances metabolism and hormonal activity, restores tissue damage, improves brain function, increases energy, and acts as a natural antidepressant. NAD+ is a derivative of Niacin (Vitamin B3). NAD+ and Niacin are unrelated to nicotine. NAD+ in the body decreases with age.

Simple NAD+ Intravenous (IV) Treatment is a healthy alternative to pharmaceutical medications for a variety of recovery or enhancement treatments. NAD+ stimulates the body to replace and balance depleted vitamins and minerals, and increase natural defenses to detox the body of artificial chemicals so it can heal. It greatly helps to repair and restore the body from damages and stressors, and also helps counter depression and mood-swings.

Most importantly, NAD+ Therapy reduces non-beneficial cravings. Unlike most pharmaceutical treatment options, there are no harmful side effects associated with NAD+ treatment.

First Time
Rp. 820.000

Ingredients

- 1 or 2 bottles of Ringers Lactate
- Ranitidine
- Buscopan
- Ondansetron

Includes

- Jamu Jo 16 Mint Magic 250 ml

Ranitidine – for acid reflux, anti-ulcer, and indigestion relief, and is not addictive

Buscopan – is anticholinergic which suppresses spasms of the digestive system

Ondansetron – for anti-nausea and vomiting

Normally not all of the above medicines are prescribed, depends on the need of the patient and Doctor prescription.

Indications: In treatment of so-called Bali-Belly, food poisoning, severe heartburn, ulcers of the stomach and intestines. Medi Belly IV Infusion is also offered in treatment of gastroesophageal reflux disease (GERD) and other conditions in which acid backs up from the stomach into the esophagus, causing heartburn.

Symptoms: Abdominal bloating, cramps and pain, digestive spasms, nausea and / or vomiting, urgency / frequency in going to the toilet, diarrhoea, mild temperature, general malaise (weakness or discomfort).

Prescription: Given only after BSI Doctors or Nurse Practitioners have examined the patient and have determined effectiveness and dose.

These BSI Medicines may be prescribed for after IV administration is complete :

- Bath kit with Vita Bath and Compound SO (Magnesium and relaxing salts and herbs)
- Probiotics with first meal and once each day with the same meal.
- Dietary considerations: No caffeine, No sugar

First Time
Rp. 850.000

Ingredients

- Ringer's Lactate
- Furosemide

Indications: Recommended for adult patients for the treatment of edema associated with renal disease and nephrotic syndrome, liver disease, and heart disease. Furosemide is particularly useful when an agent with greater diuretic potential is desired.

Symptoms: Subcutaneous swelling due to water retention, and the inability to urinate properly.

Prescription: Administered via IV Infusion, only after BSI Doctors or Nurse Practitioners have examined the patient and have determined effectiveness and dose.

Actions: Faster acting when given by IV, thus allowing replenishment of electrolytes and in prevention of dehydration due to the effects of Furosemide.

Cautions: Generally only given via IV infusion. It can become addictive, if the causes are not remedied. Do not give with Vitamin C, other vitamins, or BSI Vita-IV infusions during the same day.

In patients with hepatic cirrhosis and ascites, furosemide therapy is best initiated under direct doctor supervision. In hepatic coma and in states of electrolyte depletion, therapy should not be instituted until the basic condition is improved. Sudden alterations of fluid and electrolyte balance in patients with cirrhosis may precipitate hepatic coma; therefore, strict observation is necessary during the period of diuresis. Supplemental potassium chloride and, if required, an aldosterone antagonist are helpful in preventing hypokalemia and metabolic alkalosis.

Cases of tinnitus and reversible or irreversible hearing impairment and deafness have been reported. Reports usually indicate that furosemide ototoxicity is associated with rapid injection, severe renal impairment, the use of higher than recommended doses, hypoproteinemia or concomitant therapy with aminoglycoside antibiotics, ethacrynic acid, or other ototoxic drugs. If the physician elects to use high dose parenteral therapy, controlled intravenous infusion is advisable (for adults, an infusion rate not exceeding 4 mg furosemide per minute has been used).

First Time
Rp. 850.000

Ingredients

- Acetaminophen
- 1 or 2 bottles of Ringer's Lactate infusion medium. Which includes: 500 ml of pure water, with 4 types of electrolyte salts; Calcium Chloride 2h20, Potassium Chloride, Sodium Chloride, Sodium Lactate (like in sports drinks, gives energy and strengthens stamina).

Indications: Paracetamol (acetaminophen) is the most commonly prescribed analgesic for the treatment of acute pain, but only reduces pain by a small amount. More importantly is indicated for the short-term treatment of fever, especially following surgery, and an urgent need to treat weaker pain or greater hyperthermia and / or when the oral route of administration is not advisable.

Symptoms: Mild to moderate pain and / or all grades of fever. Headache, Toothache, Ear Pain, Joint Pain, Periods Pain, Fever and other conditions.

Prescription: Administered via IV Infusion, only after BSI Doctors or Nurse Practitioners have examined the patient and have determined effectiveness and dose.

After the patient is feeling better, BSI may recommend:

Level 2 Analysis and prescription to clear and heal causes of the fever and / or pain.

- Jamu Jo No. 3 Curcumin
- Jamu Jo No. 10 Jintan Hitam
- Jamu Jo No. 11 Manggis
- Compound PIN, Pain Anodyne
- Compound V Vita Bath with Compound SO Bath Oils

Actions: Faster acting when given by IV, thus allowing replenishment of electrolytes and in prevention of dehydration or stomach upset.

Cautions: Do not give with Vitamin C, other vitamins, or BSI Vita-IV infusions during the same day. If the patient drinks more than three alcoholic beverages per day, never use more than 2 grams (2000 mg) per day. Causes liver toxicity once above therapeutic levels or from habitual use. Do not use if the patient has severe liver disease.

First Time
Rp. 545.000

Ingredients

- 1 or 2 bottles of Ringer's Lactate. Which includes: 500 ml of pure water, with 4 types of electrolyte salts; Calcium Chloride 2h20, Potassium Chloride, Sodium Chloride, Sodium Lactate (like in sports drinks, gives energy and strengthens stamina).

Includes

- Jamu Jo No. 16 Mint Magic 250 ml, to sip during the infusion, to settle stomach, and freshen breath and mood.

Indications: Recommended for adult patients for the treatment of mild hangover symptoms, associated with dehydration and / or minor headache, due to excess alcohol consumption. Also beneficial in cases of severe dehydration due to surfing and other athletic events that have caused severe dehydration.

Symptoms: Minor tiredness, dehydration, hot urine, dark urine, headache, disorientation.

Prescription: Administered via IV Infusion, only after BSI Doctors or Nurse Practitioners have examined the patient and have determined effectiveness and dose.

Actions: Faster acting when given by IV, thus allowing rapid replenishment of salt and fluids in prevention of alcohol toxicity due to the effects of dehydration and excess alcohol poisoning.

Cautions: In the event of more severe symptoms, such as vomiting, disorientation, alcohol poisoning, consider the Medi Hangover Severe Symptoms Infusion set. Do not take with Vitamin C, other vitamins, or BSI Vita-IV infusions during the IV session.

First Time
Rp. 950.000

Ingredients

- 1 or 2 bottles of Ringer's Lactate. Which includes: 500 ml of pure water, with 4 types of electrolyte salts; Calcium Chloride 2h20, Potassium Chloride, Sodium Chloride, Sodium Lactate (like in sports drinks, gives energy and strengthens stamina).

and a combination of the following, depending on symptoms:

- Ondansetron – prevents nausea and vomiting
- Omeprazole – blocks gastric acid production

Normally not all of the above medicines are prescribed, depends on the need of the patient and Doctor prescription.

Ingredients

- Jamu Jo No. 16 Mint Magic 250 ml, to sip during the infusion, to settle stomach, and freshen breath and mood.

Indications: Recommended for adult patients for the treatment of symptoms related to moderate and severe hangover from alcohol consumption.

Symptoms: Nausea, diarrhea, vomiting, stomach and intestinal pain, severe headache, dehydration.

Prescription: Administered via IV Infusion, only after BSI Doctors or Nurse Practitioners have examined the patient and have determined effectiveness, ingredients, and dose.

Actions: Faster acting when given by IV, thus allowing replenishment of electrolytes and in prevention of dehydration due to the effects of digestive stress.

Cautions: Generally only given via IV infusion. Do not give with Vitamin C, other vitamins, or BSI Vita-IV infusions during the same day.

First Time
Rp. 850.000

Ingredients

- Ringer's Lactate
- Diphenhydramine

Indications: Temporarily alleviates symptoms of conditions such as arthritis, blood disorders, severe allergic reactions, certain cancers, eye conditions, skin / kidney / intestinal / lung diseases, and immune system disorders. It decreases immune response to reduce symptoms such as swelling, pain, and allergic-type reactions.

Symptoms: Moderate and severe allergic reactions, anaphylaxis, asthma, autoimmune diseases, blood disorders, gastrointestinal diseases and endocrine disorders.

Prescription: Given only after BSI Doctors or Nurse Practitioners have examined the patient and have determined effectiveness and dose.

These BSI Medicines may be prescribed for after IV administration is complete :

- Jamu Jo No. 3 Curcumin
- Jamu Jo No. 10 Jintan Hitam
- Jamu Jo No. 16 Mint Magic and several others
- Bath kit with Vita Bath and Compound SO (Magnesium and relaxing salts and herbs)
- Probiotics with first meal and once each day with the same meal
- Compound EDR Edema and Diuretic Relief
- Compound IFP Anti-inflammatory for Muscles, Joints, High Blood pressure

Actions: IV administration is consider the best route, better than oral, because it bypasses digestion, allowing for continued proper digestion. IV Infusion also allows for better and quicker hydration and replenishment of electrolytes.

Cautions: This medicine is only to be used in the event of a temporary over-active immune system, and auto-immune indications. It should not be used when patients are moderately or overly immune deficient.

First Time
Rp. 850.000

Ingredients

- Keterolac
- Ringer's Lactate infusion medium, with pre and post infusion with one bottle of Vita Hydrate.

Indications: Ketorolac is used for the short-term treatment of moderate to severe pain in adults. It is usually used before or after medical procedures or after surgery. Reducing pain helps the body to better rest.

Symptoms: Moderate or severe pain. Often used to control pain after surgery and painful injuries.

Prescription: Given only after BSI Doctors or Nurse Practitioners have examined the patient and have determined effectiveness and dose.

These BSI Medicines may be prescribed for after IV administration is complete :

- Jamu Jo 10 Jintan Hitam (1 litre)
- Jamu Jo 16 Mint Magic (250 ml)
- Bath kit with Vita Bath and Compound SO (Magnesium and relaxing salts and herbs)
- Probiotics with first meal and once each day with the same meal.

Actions: Effects begin nearly immediately and last for up to eight hours. A nonsteroidal anti-inflammatory drug (NSAIDs), Ketorolac is not a narcotic and is not habit-forming. It will not cause physical or mental dependence, as narcotics can. IV administration is consider the best route, better than oral, because it bypasses digestion, quickly relieving symptoms and not causing stomach upset. It works by blocking certain natural substances in the body to reduce pain and swelling. IV Infusion also allows for better and quicker hydration and replenishment of electrolytes.

Cautions: Generally only given via IV the first time. Subsequent doses are generally via oral tablet. Minor interactions with other drugs can be observed when taken orally, however when via IV administration, no notable negative interactions are observed. Do not give with Vitamin C, other vitamins, or BSI Vita-IV infusions during the same day.

INFUSION BASE

- 500 ml Ringer's Lactate, NO Vitamin C _____ **460k**
- 500 ml Ringer's Lactate with 1 gram of Vitamin C _____ **663k**
- 500 ml Ringer's Lactate with 3 grams of Vitamin C _____ **673k**

VITAMIN B

- (IB) B1-B6-B12 (not more than once per week) _____ **115k**
- (IB) B1-B2-B3-B5-B6-B12 (No more than once every 2 weeks) _____ **173k**
