Specialty Services Menu

**Premium Evidence-Based Testing & Diagnostics with
Holistic Therapies**

BSI Signature Evidence-Based Diagnostics with Holistic Detox & Therapies Program

133 Tests and Evaluation (only): Rp. 4.3m
+ additional Prescribed Holistic Treatments and
Natural Medicines Therapies: Rp. 2m - 17m

105 lab tests, with examination and deep analysis, allows the patient full access to all supplemental optional testing, Therapure Nutraceuticals medicines, and personalized natural health services at BSI.

Patients who have completed the **BSI Signature Evidence-Based Diagnostics with Holistic Detox & Therapies Program**, and have become BSI members, may also participate in all programs listed below.

Basic Testing & Diagnostics + Any of the Programs Listed Here

Brain Fog Evaluation and Healing BSI Members Program

Brain fog, or mental fatigue, is not a medical condition but is instead a symptom of other medical conditions. Brain fog can interfere with daily tasks, but is rarely permanent. With avoidance of causes, healing can begin. Constant monitoring of causes is required, as is full commitment to diet and therapies. Once normal function is observed, continued simple therapy may be required.

- **Supplemental Program Brain Fog Therapy Program (only) :**
Rp. 700k – 3m.

Deep Dive Parasites and Diseases Testing and Remedies Service

BSI International Clinics offers testing for a large and diverse variety of parasitical diseases that are not normally tested elsewhere. And for many of them we can offer natural remedies, and others safe conventional remedies.

- **Supplemental Program Deep Dive Parasite Testing :**
Rp. 7m + Therapies if prescribed.

Female Fertility & Hormones Balance

Not just about fertility, but also about the 11 female hormones, and 7 master gland hormones we test and analyze – that together play an important role in the regulation of several brain functions, bone health, skin health, sexual function/libido, cardiovascular function, and cholesterol regulation, among many others.

Infertility means not being able to get pregnant after one year of trying (or six months if a woman is 35 or older).

- **Supplemental Program Rp. 7.7m (member testing only) – 21.3m (up to with therapies).**

Insomnia (Sleep Disorders)

There are many different types of sleep disorders. Some may be caused by underlying health conditions, such as jet lag, stress and anxiety, hormones, or digestive problems. Natural remedies take time and require diligent participation by the patient, as are constant commitment to diet and natural therapies.

- **Supplemental Program Insomnia Healing Program : Rp. 600k – 2m.**

Male Fertility & Hormones Balance

Not just about fertility, but also about peak performance, libido, athletic edge, weight control, and much more. Male infertility refers to, in part, a sexually mature male's inability to impregnate a fertile female. In humans it accounts for 40–50% of infertility, and before 2020, affects approximately 7% of all men.

- **Supplemental Program Rp. 7.7m (member testing only) – 21.3m (up to with therapies).**

NAD A+ Adjuvants IV Therapy BSI Members Program

NAD A+ Adjuvants IV Therapy can benefit a large number of healing processes in the body. (Nicotinamide adenine dinucleotide + adjuvants). NAD stimulates the body to replace and balance depleted vitamins and minerals, and increase natural defenses to detox the body of artificial chemicals so it can heal. As an added bonus, because BSI is a not-for-profit corporation, our price for NAD+ therapy is by far more affordable.

- **Supplemental Program NAD A+ Adjuvants Members Program (only) : Rp. 5m – 10m.**
